BOOK REVIEWS

Invertebrate Learning, reviewed by A. Gelperin; Molecular Population Genetics and Evolution, B. R. Levin; Carcinogenesis as a Biological Problem and Developmental Aspects of Carcinogenesis and Immunity, M. Mizell; Sixteenth-Century Mexico, W. Bray
REPORTS

Precision Measurement of Particulates by Light Scattering at Optical Resonance:
T. R. Marshall, C. S. Parmenter, M. Seaver .................................................. 375

Magnetotactic Bacteria: R. Blakemore ................................................................. 377

Chemical Fractionation of the Lunar Regolith by Impact Melting: J. B. Adams,
M. P. Charrete, J. M. Rhodes ............................................................................. 380

Clades versus Clones in Evolution: Why We Have Sex: S. M. Stanley .................. 382

Direct Observation of Domains in Wet Lipid Bilayers: S. W. Hui and D. F. Parsons 383

Arrhythmically Singing Crickets: Thermoperiodic Reentrainment After Bilobectomy:
B. Rence and W. Loher .................................................................................. 385

Heteropolypeptides from Poly-α-Cyanoglycine and Hydrogen Cyanide: A Model for
the Origin of Proteins: R. Minard et al. .............................................................. 387

Solubilization of a Stereospecific Opiate-Macromolecular Complex from Rat Brain:
E. J. Simon, J. M. Hiller, I. Edelman .................................................................... 389

Melanoma Antigens That Produce Cell-Mediated Immune Responses in Melanoma
Patients: Joint U.S.-U.S.S.R. Study: V. V. Gorodilova and A. Hollinshead ......... 391

Thermal Transitions in Human Plasma Low Density Lipoproteins:
R. J. Deckelbaum et al. ..................................................................................... 392

Binaural Beats at High Frequencies: D. McFadden and E. G. Pasanen .............. 394

Myasthenic Gravis: Passive Transfer from Man to Mouse: K. V. Toyka et al. ........ 397

Hypothalamic Hyperphagia: Dissociation from Hyperphagia Following Destruction
of Noradrenergic Neurons: J. E. Ahlskog, P. K. Randall, B. G. Hoebel .......... 399

Technical Comments: Nomenclature of Eukaryotic DNA Polymerases: A. Weissbach
et al.; Histamine and Radiation-Induced Taste Aversion Conditioning:
G. R. Sessions; C. J. Levy et al. ........................................................................ 401

MEETINGS

PRODUCTS AND
MATERIALS

Plastic Blood Sample Mailer; Thyroxine Radioimmunoassay; Biofeedback
Instrumentation; Rectified Microscope Optics; Reagent Test Strips; Blood
Dialysis; Cardiac Output Computer; Log-Logit Probability Plotting; Hand-
Operated Vacuum Pump; Allergy Radioimmunoassay, Literature ......................... 408

American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its
purpose is to further the work of scientists, to facilitate cooperation among them, to improve the effective-
ness of science in the promotion of human welfare, and to increase public understanding and appreciation of
importance and promise of the methods of science in human progress. Postmaster: Send Form 3579 to
CE, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005.

Cover

Separation of domains in a hydrated bilayer of cholesterol and dipalmitoyl
lecithin mixture at a molar ratio of 0.65 at 11°C, as viewed by selective
reflection dark-field electron microscopy (about × 26,000). See page 383. [S. W.
Hui and D. F. Parsons, Roswell Park Memorial Institute, Buffalo, New York]
