Parietal Eyes in Lizards: Zoogeographical Correlates: G. C. Gundy, C. L. Ralph, G. Z. Wurst ...................................................... 671
α-Lactalbumin Production in Human Mammary Carcinoma: H. N. Rose and C. M. McGrath ....................................................... 673
Sensitive Period for the Development of Human Binocular Vision: M. S. Banks, R. N. Aslin, R. D. Letson ...................................... 675
Apneas During Sleep in Infants: Possible Relationship with Sudden Infant Death Syndrome: C. Guilleminault et al. ......................... 677
Induced Transfer of Higher Plant Chloroplasts into Fungal Protoplasts: I. K. Vasil and K. L. Giles .................................................... 680
Makisterone A: A 28-Carbon Hexahydroxy Melting Hormone from the Embryo of the Milkweed Bug: J. N. Kaplanis et al. ............ 681
In vitro Demonstration of an Endothelial Proliferative Factor Produced by Neural Cell Lines: R. L. Suddith et al. ......................... 682
Production of Globules in Mouse L Cells Penetrated with Hamster Sperms: L. C.-T. Lau .............................................................. 684
Preferences for Sweet and Salty in 9- to 15-Year-Old and Adult Humans: J. A. Desór, L. S. Greene, O. Maller .............................. 686
Molluscan Gastrin: Concentration and Molecular Forms: E. Straus, R. S. Yalow, H. Gainer ............................................................ 687
Vocabulary Richness: A Sociolinguistic Analysis: D. Sankoff and R. Lessard .......................................................... 689
Auto-Shaping in Rats to the Presentation of Another Rat Predicting Food: W. Timberlake and D. L. Grant ............................................ 690
Effects of Long-Term Corn Consumption on Brain Serotonin and the Response to Electric Shock: L. D. Lytle et al. ......................... 692

Controlled Environment Cage Racks; Stereomicroscope; Instrumentation Interface; Diagnostic Ultrasound; Transmission Electron Microscope; Ion-Gas Analyzer; Computerized Whole-Body X-ray; Optical Waveguide Digital Link; Data Acquisition System; Scanning Electron Microscope; Illuminated Water Bath; Literature ........................................................................... 699

COVER
Terminal phase male of the bluehead wrasse (Thalassoma bifasciatum): Males of this coloration are often the result of sex changes in previously female fish. See page 633. [D. R. Robertson, Smithsonian Tropical Research Institute]
