Which?
Ion Exchanger • Column • Gradient Mixer

SEPHADEX® ION-EXCHANGERS
Two anion exchangers and two cation exchangers cover the whole range pH 2—12. High capacities for proteins, polynucleotides and other biopolymers MW 1000—200,000 are ensured as each ion-exchanger type is available in two porosities. 1 gram protein can be fractionated on a 30 ml bed of DEAE-Sephadex A-50 using only 10 % of its available capacity.

PHARMACIA COLUMNS
Fast separations using columns of the K15 and K16 series exploit to the full the high capacities and superior resolution of Sephadex ion-exchangers. Columns K 16/20 and K 15/30 are particularly suitable for bed volumes up to 40 or 50 ml. Thermostat jacket and flow control valve are standard on the K16 columns.

PHARMACIA GRADIENT MIXER GM-1
The prime requirement for the production of linear ionic strength gradients is efficient mixing of the components of the gradient. In the Pharmacia Gradient Mixer GM-1 this is achieved by a blade configuration which lifts the dense incoming solution from the bottom of the mixing chamber and distributes it evenly throughout the whole eluant at a low stirring speed. Gradients in aqueous and most organic solvents can be formed on the GM-1.

Used together, Sephadex ion-exchangers and apparatus from Pharmacia Fine Chemicals provide practical chromatographic systems capable of the highest resolution in the ion-exchange chromatography of biopolymers.

Choosing the right environmental science text

Turk et al.:
ECOSYSTEMS, ENERGY, POPULATION
Here's a unique, biology-oriented approach to ecology and environmental science that can give this vital subject added relevance for your students.

The principles of natural ecology, population ecology, and speciation in natural systems are discussed in detail providing a comprehensive introduction for the beginning student. The authors also consider three special problems of man’s interaction with his environment: human population growth, energy and agriculture, in an effort to widen the student's perspective. Significant scientific, social and economic issues are integrated into these discussions. Coverage includes the nitrogen and carbon cycles, natural selection, species saturation, population dynamics and island biogeography.

Concentrating on the biological implications and aspects of environmental science, this inexpensive book ably serves as the text for one-semester courses or as a stimulating and informative supplement for general biology programs.

A wide variety of study problems, lists of suggested assignments and answers for all computational exercises are included. The text features a glossary of important terms and a variety of graphs, photos, and original artwork to help students visualize salient discussion points. An Instructor's Guide is also available.

By Jonathan Turk, Naturalist; Janet T. Wittes, Hunter College, CUNY; Robert Wittes, MD, Memorial Sloan-Kettering Center; and Amos Turk, City College, CUNY. 296 pp. 108 ill. Soft cover. $7.95. Feb. 1975.

NEUROSCIENCE

BASIC PRINCIPLES OF NEUROSCIENCE
William D. Willis, Jr. and James Blankenship
Edited by Harold M. Pinsker
University of Texas Medical Branch, Galveston
Each unit contains approximately 50 color slides, a 45-minute (approx.) cassette and a script. The level is advanced undergraduate/graduate.

Unit 1. Electrical and Chemical Concepts Basic to Neuro-Neuropysiology
Unit 2. Ionic Basic of Resting and Action Potentials
Unit 3. Electrical Model of the Membrane
Unit 4. Electrophysiology of Nerve Fibers
Unit 5. Synaptic Transmission
Unit 6. Basic Sensory Mechanisms
Unit 7. Peripheral Nerve and Somatic Sensory Receptors

Each Unit: $50.00; Complete Set: $340.00.

Other related titles
- Modular Lab Sessions for Physiological Psychology. Twelve slide-cassette modules. Thomas B. Perera, Barnard College. $375.00.
- Introduction to Neurophysiology: Aplysia, An Ideal Preparation. Two parts, techniques and principles. Thomas L. Harrington, Univ. of Nevada. $53.00.

ACAROLOGY
University of California Berkeley
Assistant Professor of Entomology
Position available. Research and teaching in acarology. Ph.D. required with broad training in acarology and a general entomological background. Expertise in clinical and laboratory analysis of the systematic biology, ecology, and biology of the Acarina is essential. Assignment will include management of the university’s mite and tick rearing collections. The position in evolutionary biology of mites is a desirable additional option. Send curriculum vitae, all official transcripts, copies of publication lists, and three letters of recommendation to: Dr. Evert I. Schlinger, Chairman, Division of Entomology and Parasitology, University of California, Berkeley, California 94720.
The University of California is an Equal Opportunity, Affirmative Action Employer. Women and minority candidates are urged to apply.

GENETICS/PLANT PATHOLOGY
ASSISTANT PROFESSOR
The Genetics and Plant Pathology Departments at the University of California at Berkeley seek to appoint a Somatic Cell Plant Geneticist, effective 1 February 1976. Training in genetics and molecular or cellular biology is essential. Responsibilities include undergraduate and graduate teaching and a research commitment to plant somatic cell genetics. This position will be considered for a tenured biologist position. Send curriculum vitae, transcripts, reprints, brief statement of research plans, and three letters of recommendation to: Chairman, Search Committee, Genetics Department, University of California, Berkeley, California 94720. Deadline for completed applications: 31 December 1975.
The University of California is an Affirmative Action/Equal Opportunity Employer.

ASSISTANT PROFESSOR IN GEOPHYSICS
The University of Texas at Austin, Department of Geological Sciences, invites applications for this position effective 1 September 1976. Responsibilities include teaching in geophysics, electrical engineering, physics, or applied mathematics, with an interest and background in theory of applied geophysics. The position is tenure-track. Current geophysical facility at Austin includes Milo M. Backus, Claude W. Horton, Sr., Wulf Massell, and Will Rust. Major thrust is exploration geophysics with emphasis on seismic reflection exploration. Facilities include a Phoenix seismic processing system, access to the University Computation Center (CDC 6600), an analog seismic field recording system, and a nearly complete earthquake seismic recording station. Research is underway in geochemistry, tectonics, theoretical geophysics, sedimentology, and sedimentary geology.

Applications will be considered for a position in geophysics at the University of Texas at Austin. Mail applications to: Dr. C. A. Barrac, Department of Geological Sciences, University of Texas at Austin, Austin, Texas 78712.

ASSISTANT RESEARCH PROFESSOR
Applications invited from individuals wishing to collaborate in ongoing research program in neuroendocrinology of reproduction. Applicant should have postdoctoral experience. The University of California, Berkeley.

BIOCHEMIST: Challenging position in research and teaching at the University of California. Excellent benefits and working conditions. One-year appointment. Please send résumé, bibliography, and statement of research and teaching interests to: Dr. L. Dimond, Personnel Office, College of Medicine and Dentistry of New Jersey-Rutgers Medical School, Piscataway, New Jersey 08854.

DRUG DISPOSITION RESEARCH
Position available for individual (Ph.D. or equivalent) with 1-5 year's experience in the areas of pharmacokinetics and drug metabolism (emphasis on kinetics) to head research section in an international pharmaceutical organization. Ideal candidate will have experience with compartmental modeling, design of bioavailability studies, computer assisted analysis of data, protein binding techniques, GLC, LC, MS, etc. Interest in structure-activity correlates to pharmacokinetics and drug metabolism is necessary. Letters of application with curriculum vitae should be addressed to:

DEAN
The Florence Heller Graduate School For Advanced Studies In Social Welfare
BRANDEIS UNIVERSITY
Waltham, Massachusetts 02154

The Heller School is a professional school offering a Ph.D. program in the broad area of social policy and planning. The Dean is the academic and administrative head of the School, which comprises 25 faculty and about 100 doctoral candidates. In addition, the Dean has principal responsibility for University relations, coordinating program development, fund raising, and external relations.

Candidates’ professional accomplishments should indicate outstanding leadership ability, administrative competence, scholarly attainment, and the capacity to work effectively in a multidisciplinary setting of social science and social welfare.

Nominations and applications, containing all relevant supportive materials, should be submitted to Professor Helen Codere, Chairperson, Search Committee, Office of the Dean of the Graduate School, Brandeis University, Waltham, Massachusetts 02154.

Application deadline: December 1, 1975.

BRANDEIS UNIVERSITY is an equal opportunity, affirmative action employer.

SCIENCE, VOL. 190

POSITIONS OPEN

BIOCHEMIST. Assistant Research Scientist position available immediately for Ph.D. in biochemistry or related area with interest and expertise in tumor antigen, isolation, and characterization. Also, opening for Assistant Research Scientist for research project in amino acid metabolism diseases in children. Prefer Ph.D. or master’s with several years of research experience. Require experience in gas chromatography, fatty acids, and enzymology. Submit curriculum vitae, statement of research interests, bibliography, and three references to: Miss M. Kerans, Personnel Department, New York University Medical Center, 587 First Avenue, New York, N.Y. 10016. An Equal Opportunity/Affirmative Action Employer, M/F.

BIOLGIISTS

Centenary College, a 4-year liberal arts institution, with a strong premed program, seeks to fill two positions in the Department of Biology at the assistant and associate professor levels. Candidates should have established a professional reputation and be dedicated to the teaching profession. A broad biological background and teaching experience is required. Research in the candidate’s specialty is encouraged. Send letters and resumes to: Dr. A. B. McPherson, Department of Biology, Centenary College, Shreveport, Louisiana 71104.

Centenary College is an Equal Opportunity Employer

CELL BIOLOGIST ENZYMOLOOGIST

This is a unique opportunity to join a newly formed group within the Merck Institute of Therapeutic Research located in Rahway, New Jersey. The group is concerned with fundamental research projects involving tissue culture and analysis of cellular enzyme systems. A Ph.D. with at least 2 years of postdoctoral experience required. We encourage publication of results and academic affiliations. This is a high-level career opportunity and you will find it offers an excellent compensation package and highly professional work environment. Send resume, including salary requirements, in confidence to: W. T. Jackson, Employment Supervisor.

MERCK & CO., INC.

Rahway, N.J. 07065
Equal Opportunity Employer M/F

CHAIRPERSON, DEPARTMENT OF PATHOLOGY

The University of Virginia School of Medicine is seeking candidates for head of the Department of Pathology. The appointee will be responsible for all educational, research, and service programs in both anatomic and clinical pathology at the University of Virginia Medical Center. Candidates are invited to submit a curriculum vitae and one or more letters of reference to: Dr. Howard G. Stamey, Chairman, Department of Pathology, University of Virginia Medical Center, Charlottesville, Virginia 22903. The University of Virginia is an Equal Opportunity/Affirmative Action Employer.

EXECUTIVE OFFICE OF THE PRESIDENT COUNCIL ON ENVIROMONAL QUALITY

The Council on Environmental Quality is a small federal agency (permanent staff of 44) responsible for advising the President and Executive Branch on environmental matters. Two professional staff positions are currently open in the fields of occupational and environmental health. Staff members are responsible for policy research and oversight in particular subject fields (for example, in these cases occupational health, carcinogen and mutagen policy, and approaches to postlicensure surveillance. Excellence in resident medical position is available for highly qualified M.D.’s. The other position is for a specialist in public health (preferably a Ph.D. in epidemiology, toxicology, or environmental medicine). Salary range depends upon training and experience. Interested applicants should submit a résumé and the names of at least three people who can be contacted as references. Correspondence should be addressed to: Senior Staff Member for Environmental Health, Council on Environmental Quality, 722 Jackson Place, NW, Washington, D.C. 20506. An Equal Opportunity Employer

POSITIONS OPEN

ASSISTANT PROFESSOR OF BIOCHEMISTRY, University of Nebraska, Lincoln. Permanent joint appointment in the Department of Chemistry and School of Life Sciences, available February 1976. Research area open, teaching in biochemistry primarily, postdoctoral experience required. Address inquiries to Dr. W. Strecker, Department of Chemistry, University of Nebraska, Lincoln, Nebraska 68588, before 15 December 1975. The University of Nebraska is an Equal Opportunity Employer.

Both senior and junior positions are available for well-qualified CELL BIOLOGISTS in the Department of Anatomy and Neurobiology, Washington University School of Medicine, St. Louis. Postdoctoral experience is required and training in histology is desirable. The position involves both teaching and research. Academic rank will be commensurate with qualifications. Applications from women and from members of minority groups will be encouraged. Applicants should submit a biographical sketch and list of publications and should have letters of recommendation sent by three individuals to:

Dr. Richard P. Bang, Department of Anatomy and Neurobiology Washington University School of Medicine 660 South Euclid Avenue St. Louis, Missouri 63110
An Equal Opportunity/Affirmative Action Employer

The School of Medicine of the University of California, Davis, invites applications for the position of CHAIRMAN of the Department of Physical Medicine and Rehabilitation. The Board-certified psychiatrist with substantial, demonstrated teaching, research, and administrative abilities who will provide leadership in this important area. Applicants should send a curriculum vitae and other supporting information to Ernest Gardner, M.D., Chairman, Search Committee on Neurology, University of California, Davis, California 95616. The University of California is an Affirmative Action/Equal Opportunity Employer.

The University of California, Irvine, College of Medicine is seeking a CHAIRMAN for the Department of Anatomy. Candidates must be eligible for appointment to the rank of professor. Candidates should have demonstrated excellence in medical research and teaching and should preferably have administrative experience. Candidates should be capable of providing academic leadership in the organization and development of the department. Applications from all qualified candidates are welcome; minorities and women are encouraged to apply. Send curriculum vitae, before 1 December 1975, to Richard F. Thompson, Chairman of the Search Committee, Department of Psychology, University of California, Irvine, California 92664.

The School of Medicine at the University of California at Davis is seeking a qualified physician as CHAIR-PERSON for a newly organized Department of Dermatology. High clinical competence, academic experience, and administrative ability will be desirable. Salary to be consistent with level of academic appointment. Interested persons please send résumés to:

James J. Castiles, M.D.
Department of Internal Medicine
Section of Dermatology
School of Medicine, TB 172
University of California
Davis, California 95616
We are an Equal Opportunity Employer. Minority applicants encouraged.

UNIVERSITY FACULTY POSITION IN Virology, Virology

Applications are invited for a faculty addition to the Division of Plastic and Reconstructive Surgery, Department of Surgery, University of Cincinnati Medical Center. The University is seeking candidates for a full-time faculty position who are certified by the American Board of Surgery and at least qualified by the American Board of Plastic Surgery. Excellence in research and student teaching and clinical research interests are considered essential and a limited private practice is available. Send curriculum vitae as well as three references should be sent to:

Henry W. Neale, M.D., Director Division of Plastic and Reconstructive Surgery Department of Surgery University of Cincinnati College of Medicine Cincinnati, Ohio 45267
The University of Cincinnati is an Equal Opportunity/Affirmative Action Employer.
ETHOLOGIST: The Department of Wildlife Science seeks a tenure-eligible and experienced science faculty position at the assistant professor level. The candidate will be deeply involved in teaching wildlife management and related courses. The position will be filled before the end of the academic year. Applications are due by December 1, 1975. See curriculum vitae and names of referees with reference to Dr. John P. DeFeo, Chairman, Department of Wildlife Science, University of Alaska, Anchorage, Alaska 99504.

FACULTY POSITION, assistant professor, academic year, available in archaeology and anthropology. Applicants must be expected to begin work in August, 1976. The University of Nebraska-Lincoln, Department of Anthropology, and the University of South Carolina, Department of Anthropology, are collaborating in the search for this position. Application deadline is December 1, 1975. See curriculum vitae and names of referees with reference to Dr. Robert C. Saitta, Chairman, Department of Anthropology, University of Nebraska-Lincoln, Lincoln, Nebraska 68588.

FACULTY POSITION, assistant professor in English, Southern Illinois University at Carbondale. Applications are invited for a position at the assistant professor level. The candidate is expected to have a Ph.D. in English and to teach general education courses in English composition. Teaching load is 12 credit hours per semester. The current starting date is August 1, 1976. See curriculum vitae and names of referees with reference to Dr. J. D. Pyles, Chairman, Department of English, Southern Illinois University at Carbondale, Carbondale, Illinois 62901.

FACULTY POSITION, assistant professor in mathematics, New York City College of Technology, City University of New York. The position is available for the fall semester, beginning September 1, 1976. Further information is available from the Director, Mathematics Division, New York City College of Technology, City University of New York, 250 Washington Avenue, Brooklyn, New York 11201. See curriculum vitae and names of referees with reference to Dr. W. H. Smith, Chairman, Mathematics Division, New York City College of Technology, City University of New York, 250 Washington Avenue, Brooklyn, New York 11201.

FACULTY POSITION, assistant professor in geography, Southern Illinois University at Carbondale. The candidate is expected to have a Ph.D. in geography and to teach general education courses in geography. Teaching load is 12 credit hours per semester. The current starting date is August 1, 1976. See curriculum vitae and names of referees with reference to Dr. J. D. Pyles, Chairman, Department of Geography, Southern Illinois University at Carbondale, Carbondale, Illinois 62901.
PHYSIOLOGIST. The Department of Zoology, University of Hawaii, is seeking applicants for a 9-month instructional position at assistant or associate professor rank beginning September 1976. Major responsibilities include giving an undergraduate course, lab, and research courses in the field of chemical and/or molecular biology, and pursuing an important research problem and providing specialized instruction and research guidance for graduate students. While a specific rank and field of the physiologist in marine organisms would be relevant to the existing departmental emphasis, the search will emphasize evidence of independence and initiative in pursuing an important research problem and the relevance of the candidate's program to the unique midocean, tropical resources available in Hawaii. Preference will be given to candidates with previous teaching and research experience. Send a curriculum vitae, bibliography, recent reprints, and names of three references to: Jan M. Cooke, Chairman, Search Committee, Department of Zoology, University of Hawaii, 2538 The Mall, Honolulu, Hawaii 96822. Applications should be received before January 1976. An Equal Opportunity/Affirmative Action Employer.

PLANT PHYSIOLOGIST, Ph.D. Undergraduate teaching position at small liberal arts college starting September 1976. Teaching responsibilities include general plant and microbial physiology and taxonomy. An equivalent to a B.S. in biology or plant physiology/anatomy, and one year of full-time experience in a research laboratory is required. Salaries: $11,200 to $14,200 for a 9-month period. Send application to: Dr. Edward Kopta, Search Committee Chairman, Department of Biological Sciences, Montana State University, Bozeman, Montana 59717. An Equal Opportunity/Institution for Women and Minorities.

POSTDOCTORAL POSITION available to individual interested in studies on CNS regulation of gonadotropin secretion, mechanism, sites of sex steroid feedback action, and interactions of monoamines and releasing factors. Training in endocrine and/or pharmacological approaches and some molecular biochemistry desirable. Available for 1 year. Send a curriculum vitae to: Dr. C. A. Barracough, Department of Physiology, School of Medicine, University of Maryland, Baltimore, Maryland 21201. An Equal Opportunity/Affirmative Action Employer.

POSTDOCTORAL RESEARCH TRAINEESHIP IN DIGESTIVE DISEASES

Opportunities are available for research training in digestive disease research. Applicants should have either an M.D. or an equivalent degree with appropriate postdoctoral clinical training or have a Ph.D. in basic science. Training is dependent upon the needs of the candidate. Areas of training include characterisation and regulation of intestinal digestive enzymes, study of gastrointestinal hormone receptor-hepatic lipids and lipoprotein metabolism, hormone radioimmunoassay, and controlled clinical trials in liver disease. Applicants should call or send curriculum vitae, bibliography, recent reprints, and three letters of recommendation to: G. M. Gray, M.D., Division of Gastroenterology, Stanford University School of Medicine, Stanford, California 94305. Telephone: 415-497-4588. An Equal Opportunity/Affirmative Action Employer.

PROFESSOR OF ORGANIC CHEMISTRY. An organic chemist of high scientific accomplishment is sought for an open tenure track position as full professor. The individual should have a distinguished record of research achievement and an interest in teaching. Applicants must have earned a Ph.D. in organic chemistry or in an equivalent major field, and be capable of attracting students and excellence in the field. Salary is negotiable. An application letter and a curriculum vitae must be sent to: Professor J. R. Milas, Chairman, Search Committee, Department of Chemistry, University of Southern California, Los Angeles, California 90007. An Equal Opportunity/Affirmative Action Employer.

The University of Oklahoma Health Sciences Center invites nominations and applications for the position of PROFESSOR AND HEAD of the Department of Anatomical Sciences. This position requires sound leadership ability as well as experience in teaching, administration, and research in anatomical sciences. Inquiries, including a curriculum vitae, should be sent to: Dr. E. W. Council, Chairman, Search Committee for Anatomical Sciences Head, University of Oklahoma Health Sciences Center, P.O. Box 26901, Oklahoma City, Oklahoma 73190. An Equal Opportunity/Affirmative Action Employer.

RESEARCH ASSOCIATE—Ph.D. with expertise in mammalian cell biology and particularly experience in cell fusion. The successful candidate will join cell fusion group, will be primarily responsible for doing independent research project, but will be given the opportunity to participate in teaching activities. Submit résumé to: Dr. D. H. Mansfield and Dr. T. Streips, University of Louisville, Health Sciences Center, P.O. Box 1855, Louisville, Kentucky 40201. An Equal Opportunity Employer.

RESEARCH ASSOCIATES

Squibb, a worldwide leader in the pharmaceutical and proprietary drug field has developed the following attractive opportunities at our Institute for Medical Research in Princeton, New Jersey.

Research Associate. Requires an M.S. degree with 3 years of experience in cell-mediated immunity, both in vivo and in vitro as well as appropriate experience in biochemical and radiotrace labeling techniques. Salary is negotiable. An Equal Opportunity Employer.

Research Associate or Research Assistant. Requires a B.S. or M.S. degree with 1 to 3 years of experience conducting biochemical and pharmacological research in areas concerning the therapy of immediate hypersensitivity and other inflammatory diseases. An Equal Opportunity Employer.

Squibb is an Equal Opportunity Employer.

ALASKA LEGISLATIVE STAFF PROFESSIONAL OPPORTUNITY

The Alaska State Legislature is seeking applications for Research Analyst positions with the Legislative Affairs Agency in Juneau, at salaries ranging from $16,000 to $25,000 per year. Persons applying for these positions should have demonstrated ability to apply technical expertise and/or economic theory to complex public issues; they should be capable of communicating the implications of various policy alternatives to persons with minimal technical backgrounds. The successful applicant will preferably have at least 6 years of professional education and/or experience, some of which will have been with contact with legislative decision-makers. Experience and present or prior residence in Alaska, though not mandatory, would be desirable. Persons with program experience in the following areas (or related fields) and/or particularly skillful in these areas are encouraged to apply: FISHERIES, Renewable Resource Economics, Common Property Resource Management, Land Use Management and Planning, Information Resources and Data Management, Public Utility Regulation, Government Regulation of Business, Transportation Systems, etc. Applications and detailed résumés accompanied, if possible, by a representative sample of prior work, should be submitted to: Director of Research Services Legislative Affairs Agency Pouch Y Juneau, Alaska 99811

REGULATORY AFFAIRS

A leading pharmaceutical company in the New York City area has openings for managers in regulatory affairs. A Ph.D. in one of the medical sciences and experience in regulatory affairs are preferred. Candidates selected will handle liaison with FDA and other regulatory agencies, regarding marketed pharmaceuticals and research projects and provide scientific and regulatory input to other departments and project teams. Excellent starting salary and benefits. Send résumé, including salary history in confidence to: Box 466, SCIENCE An Equal Opportunity Employer.

SCIENTIFIC DIRECTOR, DIAGNOSTIC LABORATORY

The New York State College of Veterinary Medicine is seeking a Scientific Director for its Diagnostic Laboratory. The Scientific Director is directly responsible to the Dean. The candidate and the Laboratory staff collaborate closely with a large community of veterinarians and other scientists throughout New York State working with disease identification and control. The incumbent will work with the faculty of the college in developing a program of research in integrating the laboratory into the teaching and research programs of the college. Approximately 40 employees provide the services.

The candidate whose major field of interest may be from any specialty concerned with disease identification and control should possess a Ph.D., M.D., or equivalent degree and demonstrate leadership qualities.

The Scientific Director will be a member of the faculty of the New York State College of Veterinary Medicine. The faculty rank and departmental affiliation will depend on the person's discipline and level of experience.

Applicants should send complete curriculum vitae, personal bibliography, and names of three references to: Dr. F. E. Strangeness, Jr., Department of Veterinary and Animal Sciences, Cornell University, Ithaca, N.Y. 14853. An Equal Opportunity Employer.

VASCULAR SURGEON

With interests in research, Department of Surgery, University of Washington School of Medicine, full-time position; Equal Opportunity, Affirmative Action Employer.

For additional information contact Dr. D. E. Strandness, Jr., Department of Surgery, University of Washington School of Medicine, Seattle, Washington 98104.

VICE PRESIDENT FOR MEDICAL AFFAIRS

The George Washington University School of Medicine and Health Sciences is seeking candidates for the office of Vice President for Medical Affairs. The senior officer is a member of the President's immediate staff and serves the Trustees. He is the chief executive officer of the Medical Center and is responsible for all University health-related programs including the School of Medicine and Health Sciences, the University Hospital, the Ambulatory Care Division, affiliated hospitals, and Allied Health Science programs. Candidates should have doctoral-level professional qualifications, in a strong program area, and experience in professional appointment in a University department. Substantial senior administrative and executive experience, preferably as an officer in a located center or its equivalent, is necessary. Résumés should be sent not later than 15 January 1976 to the Search Committee for the Vice President for Medical Affairs, c/o The George Washington University Medical Center, 2300 K Street, NW, Washington, D.C. 20037.

George Washington University is an Equal Opportunity/Affirmative Action Employer.
Applications are invited for a **SENIOR STAFF APPOINTMENT** by suitably qualified candidates in the area of Genetics of Higher Plants, their differentiation or biochemistry.

Candidates should have a wide experience of plant cell and tissue culture techniques. Salaries consistent with local regulations will be offered.

Applications with Curriculum Vitae and list of publications should be sent to: The Director.

---

**Head of Cell Biology Laboratory**

**EXPERIMENTAL BIOLOGY DIVISION**

A senior scientist is needed to direct the scientific research program in Cell Biology. This person will determine future research directions for the Laboratory and will hold responsibility for professional development and scientific success of the Laboratory staff.

The candidate will be an associate or full professor, or hold an equivalent position in a health care industry or research institute. Background of successful research experience in Cell Biology, Biochemistry and/or Microbiology is essential. Specific areas of research should encompass the growth and regulation of eukaryotic cells in culture, and control of gene functions during growth and maintenance.

Abbott Laboratories is located in North Chicago, Illinois, midway between Chicago and Milwaukee, Wisconsin.

Please send curriculum vitae including publications, references and salary requirements in confidence to:

---

**Research & Development Chemists**

The Diagnostics Division is seeking several Research and Development Scientists to participate in one of the most dynamic divisions of our major pharmaceutical firm.

Candidates are invited to apply who have any several of the qualifications as follows. The degree will be a Ph.D. or M.S. in one of the chemistries, with ability in immunochemistry, solid phase immobilization, antibody production and characterization, antigen-antibody or enzyme kinetics, radioisotope labelling. Active working experience in two of the above areas is highly desirable, with industrial experience preferred.

We will look for a strong track record of accomplishment in these areas as indicated by publications, patents, independent research experience. The persons we need are highly motivated, capable of independent work and/or of managing a research project, and have an energy level correspondent with the field of radiodiagnosticstics of today.

Abbott Laboratories is located in North Chicago, Illinois, midway between Chicago and Milwaukee, Wisconsin.

Please send resume with publications, references, and salary history and requirements in confidence to:

---

**FRIEDRICH MIESCHER-INSTITUT**

Basel, Switzerland

Applications are invited for **POSTDOCTORAL RESEARCH FELLOWSHIPS** tenable for up to 3 years.

Research projects will be in the following areas: Gene regulation in eukaryotes, growth regulating substances, lectin interactions with cell surfaces, noradrenaline receptors, ribosome function and biosynthesis, RNA tumor virology.

Send Curriculum Vitae with full personal details and interest profile to: Dr. R. R. Burk

---

**ABBOTT**

Professional Employment

Abbott is an Affirmative Action Employer

---

Application deadline: January 1, 1976
POSITIONS OPEN

RESEARCH ASSOCIATE AND ASSISTANT B.S. OR M.S. positions are available immediately at the Peoria School of Medicine, University of Illinois, for work in drug abuse and drug interactions mainly in animals. Experience in biochemical pharmacology, toxicology, or analytical biochemistry desired. Salary is competitive. Application deadline is December 1975. To: Dr. F. Grundhacker, Acting Chairman, Department of Basic Sciences, Peoria School of Medicine, 1400 W. Main Street, Peoria, Illinois 61606. The University of Illinois is an Equal Opportunity/Affirmative Action Employer and encourages applications from women and minorities.

THE JACKSON LABORATORY
Invites applications for NIH Traineeships in (i) mammalian genetics, (ii) cancer biology, (iii) behavior genetics, and (iv) reproductive physiology. Trainees are sponsored by one or more scientists from 34-member research staff, whose interests are varied. Projects focus on genetic studies with mice or rabbits. Stipends from $10,000 to $14,000. Open immediately. Appointments are for 1 year; some may be renewed for a second year. For further information write to Dr. Robert L. Collins, The Jackson Laboratory, Bar Harbor, Maine 04609, Equal Opportunity/Affirmative Action Employer.

SYMPOSIUM

INTERNATIONAL SYMPOSIUM ON ORGANIZATION AND EXPRESSION OF THE EUKARYOTIC GENOME

University of Tehran
2 to 6 May 1976
For further information write to:
Dr. K. Javaherian

WORKSHOP

A WORKSHOP ON INDWELLING PRESSURE TRANSDUCERS AND SYSTEMS will be held at Case Western Reserve University on 4 and 5 December 1975. Under the sponsorship of the National Institutes of Health, the workshop will explore the state of the art in the uses and new applications of indwelling pressure transducers in health care.

Persons interested in participating should contact either Dr. Wen H. Ko, Director, Engineering Design Center, Case Western Reserve University, Cleveland, Ohio 44106 (telephone: 216-368-2934), or Cecily M. Robbins, Assistant Conference Administrator, Verte Research Corporation, 6407 East Boulevard Avenue, Cleveland, Ohio 44106 (telephone: 216-663-7450).

RESEARCH FELLOWSHIPS

POSTDOCTORAL FELLOWSHIPS IN SWEDEN AND SWITZERLAND

For the Fogarty International Center, National Institutes of Health, announces Swedish Medical Research Council Fellowships for postdoctoral study in basic and clinical areas of medical research. Applicants must be United States citizens and have completed training in medicine and/or basic sciences. Application materials are due March 1, 1976.

APPLICATION MATERIALS FOR POSTDOCTORAL FELLOWSHIPS can be obtained from the Swedish Medical Research Council, P.O. Box 7000, S-104 04 Stockholm, Sweden.

POSTDOCTORAL FELLOWSHIP

The Fogarty International Center, National Institutes of Health, announces Swiss Medical Research Council Fellowships for postdoctoral study in basic and clinical areas of medical research. The Swiss National Science Foundation provides 4,500 Swiss francs ($11,627) annually for up to 2 years. Application materials are due March 1, 1976.

APPLICATION MATERIALS FOR POSTDOCTORAL FELLOWSHIPS can be obtained from the Swiss Medical Research Council, P.O. Box 7000, S-104 04 Stockholm, Sweden.

POSITIONS OPEN

RESEARCH ASSOCIATE AND ASSISTANT B.S. OR M.S. positions are available immediately at the Peoria School of Medicine, University of Illinois, for work in drug abuse and drug interactions mainly in animals. Experience in biochemical pharmacology, toxicology, or analytical biochemistry desired. Salary is competitive. Application deadline is December 1975. To: Dr. F. Grundhacker, Acting Chairman, Department of Basic Sciences, Peoria School of Medicine, 1400 W. Main Street, Peoria, Illinois 61606. The University of Illinois is an Equal Opportunity/Affirmative Action Employer and encourages applications from women and minorities.

THE JACKSON LABORATORY
Invites applications for NIH Traineeships in (i) mammalian genetics, (ii) cancer biology, (iii) behavior genetics, and (iv) reproductive physiology. Trainees are sponsored by one or more scientists from 34-member research staff, whose interests are varied. Projects focus on genetic studies with mice or rabbits. Stipends from $10,000 to $14,000. Open immediately. Appointments are for 1 year; some may be renewed for a second year. For further information write to Dr. Robert L. Collins, The Jackson Laboratory, Bar Harbor, Maine 04609, Equal Opportunity/Affirmative Action Employer.

SYMPOSIUM

INTERNATIONAL SYMPOSIUM ON ORGANIZATION AND EXPRESSION OF THE EUKARYOTIC GENOME

University of Tehran
2 to 6 May 1976
For further information write to:

Thermocouple THERMOMETERS
We make 14 thermometers, with meter or relay. All read in 2 seconds, extremely easy to use. Simply apply probe to object. In addition, National Science Foundation Fellowships provide 3,960 Swiss francs for the spouse and 1,200 Swiss francs for children.

Application materials can be obtained from the Swiss/Swedish Fellowship Section, Fogarty International Center, National Institutes of Health, Bethesda, Maryland 20014. The deadline for receipt by NIH of completed applications is 1 January 1976. Applicants will be reviewed by the Fogarty International Center. They will be forwarded to Sweden or Switzerland, as appropriate, for final selection and award in late spring 1976.

The names of authors of books reviewed are in SMALL CAPITALS.

A

Abelson, N. M., and P. H. Abelson: Detlev Bronk (editorial), 941
Abelson, P. H.: Federal intervention in universities (editorial); geophysics at the international level (News and Comment), 34. See also Abelson, N. M.
Acoustically orienting parasites: fly phonotaxis to cricket song, W. Cade, 1312
Adams, J. B., et al.: Chemical fractionation of the lunar regolith by impact melting, 380
Adelson, J.: book review of Moral development, 1288
Addy, D. N. See Maitson, W. J.
Adenosine 3', 5'-monophosphate in reproducing and differentiated trypanosomes, J. E. Strickler and C. L. Patton, 1110
Adler, P. N., et al.: Life cycle variants of Physarum polycephalum that lack the amoeba stage, 65
AEL energy policy (letter), H. A. Bethe, 1152
Aerosol chemical parameters and air mass character in the St. Louis region, A. H. Vanderpool et al., 570
Aerosol and polar temperature, W. L. Hamilton and R. A. Reck, 696
Affirmative action (letter), B. Ortiz de Montelano, 308
Age and tenure (letters), R. B. Seymour and F. Press, 219
Ahlskog, J. E., et al.: Hypothalamic hyperphagia: dissociation from hyperphagia following destruction of noradrenergic neurons, 399
Albugo-like oogonia from the American Carboniferous, B. M. Stidd and K. Cosentino, 1092
Alessi, J. Bédard et al. (Eds.), book review by R. M. F. S. Sadler, 530
Alcoholic hepatomegaly: accumulation of protein in the liver, E. Baraona et al., 794
Aldrich, S. R.: Organic farming methods (letter), 96
Alessi, A. A. See Yeh, J., et al.
Ameyaw-Akumfi, C., and B. A. Hazlett: Sex recognition in the crayfish Procambarus clarkii, 1223
An aerobic digestion: the rate-limiting process and reaction nature of inhibition, C. D. Fitney and R. S. Erdman II, 1089
Anbar, M., and G. A. St. John: Formation of negative ions under inverted field ionization conditions, 781
Anders, E., See Lewis, R. S., et al.
Anderson, D. W., et al.: Brown pelicans: improved reproduction off the southern California coast, 806
Animal behavior, J. Alcock, book review by D. P. Barash, 1084
Antibodies that impair insulin receptor binding in an unusual diabetic syndrome with severe insulin resistance, J. S. Flier et al., 63
Antibody formation in first and second generation offspring of nutritionally deprived rats, 1110
Apneas during sleep in infants: possible relationship with sudden infant death syndrome, C. Guilleminault et al., 677
Archaeological atlas of the world, D. Whitcomb and R. Whitehouse, book review by G. R. Willey, 551
Archaeology of Missouri, The, C. H. Chapman, book review by D. A. Baerreis, 1194
ARCYANA: Transform fault and rift valley from bathyscape and diving saucer, 108
Are the data worth owning? (letter), W. D. Compton, 834
Arents, J., et al.: Controversial areas of research (letters), 324
Armstrong, J. A. See Wu, B. C., et al.
Arhythmically singing crickets: thermoperiodic reorganization after bilateral surgery, B. Rence and W. Lober, 385
Aslin, R. N. See Banks, M. S., et al.
Association Affairs: AAAS News, 41, 546, 971; annual meeting, 547, 651, 871, 1079, 1190, 1285
Asteroid collisional evolution: evidence for a much larger early population, C. R. Chapman and D. R. Davis, 553
Atmospheric concentrations and inventory of krypton-85 in 1973, K. Tellegad and G. J. Ferber, 882
Auditory fatigue: retrocochlear components, R. Salvi et al., 486
AUSLOOS, p. (Ed.), Interaction between ions and molecules, book review of, 878
Auto-shaping in rats: representation of another rat predicting food, W. Timberlake and D. L. Grant, 690
Availability of grant applications (letter), E. D. Korn, 736
Axonal projections of medial preoptic and anterior hypothalamic neurons, L. C. Conrad and D. W. Pfaff, 1112
Bade, E. G. See Howe, M. M.
Bader, H. See Hoiné, J.
Baerreis, D. A.: book review of The archaeology of Missouri, 1194
Baldwin, M.: book review of The geology of continental margins, 779
Ballard, R. D., et al.: Manned submersible observations in the FAMOUS area, Mid-Atlantic Ridge, 103
Banks, M. S., et al.: Sensitive period for the development of human binocular vision, 675
Bar, R. S. See Flier, J. S., et al.
Baraona, E., et al.: Alcoholic hepatomegaly: accumulation of protein in the liver, 794
Barash, D. P.: book review of Animal behavior and the evolution of behavior, 1084
Barbour, E. S. See Knoll, A. H.
Baron, S. See Green, J. A.
Barr, R. D., et al.: Hemopoietic stem cells in human peripheral blood, 284
Barry, R. G., et al.: Continental ice sheet conditions for growth, 979
Barton, G. N. See McHugh, P. R., et al.
Bédard, J., et al. (Eds.), Alces, book review of, 550
Begleiter, H. See Donchin, E., et al.
