SCIENCE is published weekly, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. New members in the United States and possessions. Second-class postage paid at Washington, D.C., and additional entry. Copyright © 1976 by the American Association for the Advancement of Science. Membership rates on request. Annual subscription: $50; foreign postage: Canada $10, other $15, air $10 to Europe $30. Single copies $2 (back issues $3) except Materials Issue (20 Feb. 1976) is $3 and Guide to Scientific Instruments is $6. School year subscription: 8 months $37.50; 10 months $41.75. Provide 6-week notice for change of address, giving new and old address and zip codes. Send a recent address label. Science is indexed in the Reader's Guide to Periodical Literature.
REPORTS

Nuclear Ghosts: A Nonmembranous Structural Component of Mammalian Cell Nuclei: J. M. Keller and D. E. Riley .......................................................... 399

Interkingdom Fusion Between Human (HeLa) Cells and Tobacco Hybrid (GGLL) Protoplasts: C. W. Jones et al. .......................................................... 401

Thyrotropin Releasing Hormone: Development of Inactivation System During Maturation of the Rat: J. T. Neary et al. ......................................................... 403

Mg2+,Ca2+-Dependent Adenosine Triphosphatase as Receptor for Divalent Cations in Bacterial Sensing: R. S. Zukin and D. E. Koshland, Jr. ............ 405

Phosphoribosylpyrophosphate Synthetase Is Elevated in Fibroblasts from Patients with the Lesch-Nyhan Syndrome: D. W. Martin, Jr., and B. A. Maler .... 408

Insulin Binding to Cultured Human Fibroblasts Increases with Normal and Precocious Aging: A. L. Rosenbloom, S. Goldstein, C. C. Yip ........................................ 412

Streptozotocin-Induced Pancreatic Insulitis: New Model of Diabetes Mellitus: A. A. Like and A. A. Rossini .......................................................... 415

Postmatting Female Odor in Heliconius Butterflies: A Male-Contributed Antiaphrodisiac?: L. E. Gilbert .......................................................... 419

Suckling in Newborn Rats: Eliminated by Nipple Lavage, Reinstated by Pup Saliva: M. H. Teicher and E. M. Blass ............................................. 422

Sex and the Single Hemisphere: Specialization of the Right Hemisphere for Spatial Processing: S. F. Wieselton .......................................................... 425

Susceptibility of Mice to Audiogenic Seizures Is Increased by Handling Their Dams During Gestation: S. L. Beck and D. L. Gavin .................................. 427

Technical Comments: Reticulocyte Transfer RNA and Hemoglobin Synthesis: M. Litt; D. W. E. Smith .......................................................... 428

COVER

Multiple fusion aggregate showing two small dark tobacco nuclei (the “eyes”), a superimposed HeLa cell (one “ear”), and two HeLa nuclei with the cell membrane apparently continuous with the protoplast membrane and no visible intervening membranes (about × 4440). See page 401. [William Marin, Jr., Brookhaven National Laboratory, Upton, Long Island, New York]
