The names of authors of books reviewed are in SMALL CAPITALS.

A

AAAS selects Congressional Science Fellows for fourth consecutive year (AAAS), R. A. Scribner and M. C. Dolan, 41
Abele, L. G. See Diamond, J. M., et al. 41
Abelson, P. H. (editors): Glamorous nuclear fusion 279; Viking 1, 723
—and R. V. Ormes (editorial): Supporting society journals, 9
Abolition of direction selectivity in the visual cortex of the cat, M. Cynader and G. Chenenko, 304
Acetylcholine hot spots: development on myotubes cultured from aneural limb buds, A. Bekoff and W. J. Betz, 915
Acoustic tracking of ocean-dumped sewage sludge, J. R. Proni et al., 1005
Adventures of a mathematician, S. M. Ulam, book review by N. Metropolis, 567
Advisors, The, H. F. York. book review by F. J. Dyson, 668
Afzelius, B. A.: A human syndrome caused by immotile cilia, 317
Aggression and mating success in male spider mites, D. A. Potter et al., 160
Akgun, A. See Ertel, N. H., et al.
Allcock, H. R.: Polyphosphazenes: new polymers with inorganic backbone atoms, 1214
Alternative transformation behavior in sulfides: direct observations by transmission electron microscopy, A. Putnis, 417
Aluminum-26 in deep-sea sediment, J. L. Reys et al., 1119
Ames assay, The (letters), A. Sivak and F. M. Loew, 272

Ancient lithosphere: its role in young continental volcanism, C. Brooks et al., 1086
Andersen, J. M., and J. M. Dietschy: Cholesterolosis: derepression in extrahepatic tissues with 4-aminopyrazolo[3,4-d]pyrimidine, 903
Andrews, J. T. See Nichols, H., et al. See also Wright, H. E., Jr.
Angell, C. A., and H. Kanno: Density maxima in high-pressure supercooled water and liquid silicon dioxide, 1121
Argon content of the martian atmosphere at the Viking I landing site: analysis by x-ray fluorescence spectroscopy, B. C. Clark et al., 804
Aspergillus entraped in red blood cells: action and survival, S. J. Updike et al., 681
Aspergillus flavus and aflatoxin in Iowa corn before harvest, E. B. Lilleyhoj et al., 495
Astronomy and cosmology and Angkor Wat, R. Stencel et al., 281
Astronomy, architecture, and adaptation at Pueblo Bonito, J. E. Reyman, 957
Asymmetry and enzyme action, J. W. Cornforth, 121
Athey, R. D., Jr. See Hudson, H. T., et al.
Atmospheres of Earth and the planets, B. M. McCormac (Ed.), book review by J. W. Chamberlain, 569
Atsatt, P. R., and D. J. O'Dowd: Plant defense guilds, 24
Au, W. Y. W.: Cortisol stimulation of parathyroid hormone secretion by rat parathyroid glands in organ culture, 1015
Auerback, S. L., et al.: Environmental impact statements (letters), 188
Autrup, H. See Weinstein, I. B., et al.

B

Baccalaureate origins of American scientists and scholars, M. E. Tidball and V. Kristowski, 466
Bachur, N. R.: Cytoplasmic aldol-keto reductases: a class of drug metabolizing enzymes, 595
Background for the spheroidal nuclear mode proposal, J. Rainwater, 378
Baerends, G., et al. (Eds.), Function and evolution in behaviour, book review of, 993
Baker, D. A., and J. L. Hall (Eds.), Ion transport in plant cells and tissues, book review of, 45
Balding, P. See Gold, E. R.
Balls, M., and M. A. Monnickendam (Eds.), Organ culture in biomedical research, book review of, 1115
Barium in Southern California coastal waters: a potential indicator of marine drilling contamination, T. J. Chow, 57
Barlow, C. H., and B. Chance: Ischemic areas in perfused rat hearts: measurement by NADH fluorescence photography, 909
Baron, L. S.: book review of Microbial drug resistance, 756
Barry, R. G. See Nichols, H., et al.
Baum, W. A. See Carr, M. H., et al.
Baylin, S. B., et al.: Clonal origin of inherited medullary thyroid carcinoma and pheochromocytoma, 321
INDEX TO VOLUME 193

Composition and structure of the martian atmosphere: preliminary results from Viking O. N. Kieffer, 306

Composition of the atmosphere at the surface of Mars: detection of argon-36 and preliminary analysis, T. Owen and K. Biemann, 307

Computers: reassuring but dispensable (letter), D. J. Montgomery, 836

Conditioning of Pleurobranchaea, R. M. Lee and E. Myklebust, 272

Conodonts present, B. F. Glenister et al., 571

Conquest of will, The, A. Mowshowitz (Ed.), book review by K. C. Laudon, 111

Constancy and uniqueness in a large population of small interneurons, C. Goodman, 502

Cook, F. W. See Damadian, R., et al.

Cookson, C., Multiplication, d. c. burke and w. c. russell (Eds.), book review by N. P. Salzman, 756

Cook, W. S. See Nier, A. O., et al.

Cookson, J. A., and A. L. Robinson: Ion beam analysis (letter), 1070

Cool, S. J. See McCall, R. B.

Conn, B. Fusion reactor design studies (letter), 630

Cooper, E. See Diamond, J., et al.

cooper, j. p. (Ed.), Photosynthesis and productivity in different environments, book review of, 670

Cooper, N. R. See Ferrone, S., et al.

Cope, F. W. See Damadian, R., et al.

copper, et al. (Eds.), Multiplication, d. c. burke and w. c. russell (Eds.), book review by N. P. Salzman, 756

Coppens, Y., Coronary Conquest and Control of, 396

Coppers supplementation of platelets: evidence of an as-yet undescribed role in their function, J.A. Cookson and G. S. Paterson, 883

Cutts, J. A. See Carr, M. H., et al.

Cynader, M., and G. Chernenko: Abolition of direction selectivity in the visual cortex of the cat, 504

Cytochrome P-450 induction by phenobarbitol and 3-methylcholanthrene in primary cultures of hepatocytes, G. Michalopoulos et al., 907

Cytokine inhibition of DNA synthesis: effect on cyclic adenosine monophosphate in lymphocytes, B. K. Jegasothy et al., 1260

Cytoplasmic aldo-keto reductases: a class of drug metabolizing enzymes, N. R. Bachur, 595

Dacre, J. C. See Muul, L. I., et al.

Damadian, R., et al.: Structured water or pumps? (letters), 528

Damon, P. E., and S. M. Kuchen: Global cooling?, 447

Davidoff, F., et al.: (+)-Alpha-1-phenylthiophene stereospecifically inhibits Ca2+, but not ADP-stimulated mitochondrial respiration, 66

Davis, B. D.: Evolution, epidemiology, and recombinant DNA (letter), 442

Deep current measurements suggest long waves in the eastern equatorial Pacific, R. R. Harvey et al., 1083

Demographic data on the elderly, G. C. Myers, 338

Demoulin, V., et al.: Preserving national forests? (letter), 442

Density maxima in high-pressure supercooled water and liquid silicon dioxide, C. A. Angell and H. Kanno, 1121

Dent, J.: book review of Trends in comparative endocrinology, 139

Dental review on the teeth of the Ainu and Japanese, C. G. Turner II, 911

DeRubertis, F. R., and P. A. Craven: Calcium-independent modulation of cyclin GMP and activation of guanylate cyclase by nitrosamines, 897

Desmond, A. J.: The hot-blooded dinosaurs, book review of, 44

Diamond, J. M., et al.: Island biogeography and conservation strategy and limitations, 1027

Diamond-blackfan syndrome: lymphocyte-mediated suppression of erythropoiesis, R. Hoffman et al., 899

Diebitsch, E., and D. M. Andersson, J. M.

Differential resource utilization by the sexes of dioecious plants, D. C. Freeman et al., 597

Differentiation of differing concentrations of sucrose and glucose by human newborns, G. H. Nowlis and W. Kessen, 1275

2,5-Dihydroxyvitamin D in biological fluids: a simplified and sensitive assay, J. A. Eisman et al., 1023

Dinoflagellates: fossil motile-stage tests from the Upper Cretaceous of the Northern New Jersey Coastal Plain, F. E. May, 1128

Discovery of insecticides: an interdisciplinary approach, W. S. Bowers et al., 542

DNA polymerase I: essential replication enzyme, I. R. Lehman and D. G. Uyemura, 993

Dobson, P. N., J., et al. (Eds.), Proceedings of the Sixth Hawaii Topical Conference in Particle Physics, book review of, 995

Dolan, M. C. See Scriber, R. A.

Doomsday expectations (letter), W. E. Westman, 720

Dopamine-sensitive adenylate cyclase occurs in a region of substantia nigra containing dopaminergic dendrites, J. W. Keabian and J. M. Saavedra, 683

Downs, G. S. See Tyler, G. L., et al.

Drachman, D. B. See Kao, I., et al.

Drug reduction by formation movement in spiny lobsters, R. G. Bill and W. F. Herrnkind, 1143

Drinking water and cancer mortality in Louisiana, T. Page et al., 55

Dubos, R.: Symbiosis between the earth and humankind, 459

Duckett, R. J. See Nier, A. O., et al.

Dudek, G. See Mandula, B. B., et al.

Dufour’s gland: source of sex pheromone in a hymenopteroid parasitoid, R. M. Wesołoczyk, 613

Durrenberger, R. W., and A. J. Brawley: Need for a better solar radiation data base, 1154

Dwyer, D. M. See Chang, K. P.

Dynamical properties of solids, D. E. HORTON and A. A. MARADUIN (Eds.), book review by L. M. Falcov, 397

Dyson, F. J.: book review of The advisors, 668

E. See also worksheet, V. J. Maglio, 1233

Earth rotation measured by lunar laser ranging, A. Stolz et al., 997

Earth’s core, The, J. A. Jacobs, book review by V. J. Maglio, 1233

Earthquake light (letter), J. J. Lloyd, 1070

Ecanow, B. See Foley, W. A., et al.

Ecologic dilemmas, A. Wolman, 740

Editorials: Federal R & D and the economy, 1079; Glorious nuclear fusion, 279; The impacts statement for 1992, II, 193; Interciencia: new journal, new journey, 445; Politics and reason, 535; Preventive medicine, 837; An R & D delivery system, 637; R & D, the new buzzword?, 101; Scientists’ meetings: collegial versus position-al, 361; Supporting society journals, 9; Toward a new partnership, 1199; Universities and national research policy, 955; Viking 1, 715, 723

Effect of infrared transparency on the heat transfer through windows: clarification of the greenhouse effect, S. D. Silverstein, 229

Effect of stimulus sequence on the waveform of the cortical event-related potential, The, K. C. Squires et al., 1142

Ehrman, L. See Leonard, J. E.

Graphics good enough for research...

now is priced right for the classroom.

The 4006-1 from Tektronix: laboratory, time machine, testing ground . . . all for the price of alphanumerics.

Words alone don't always suffice. Very often the subject demands a graphic demonstration. Tektronix' affordable new 4006-1 lets you evolve to computer-aided Graphics demonstration right in the classroom. It's the same high-resolution Graphics on-campus research has relied on for years.

Unlike mere graphing terminals, the 4006-1 offers enough information density to take your students into dynamic, 3-dimensional detail. Enough to let them experiment with the properties of lethal radiation. To observe genetic mutations over generations. To test architectural structures against stress and strain. They can change parameters at will, or translate massive printouts into conceptual graphs.

It's a package that assures maximum flexibility: our proven interfacing and software connect with virtually all mainframes. Our new Interactive Graphing Software Package lets anyone graph with conversational ease. You get plug-to-plug peripheral options like the 4631 Hard Copy Unit that serves up to four terminals; or the 4923 Digital Cartridge Tape Recorder that takes program storage off-line. And you get Tektronix' reputation for research equipment, educational expertise, and worldwide maintenance support.

Single unit price: $2995, with generous quantity discounts. Ask your local Tektronix Sales Engineer how your discipline fits into the picture. Or write, Tektronix, Inc. Information Display Group P.O. Box 500 Beaverton, Oregon 97077
In its first issue (May–June 1976) INTERCIENCIA editor Marcel Roche extended an invitation to join in "a new journey, a new journal," a unique venture in communication among the scientific communities of the Western Hemisphere.

**INTERCIENCIA**

*a journal of science & technology for development*

... edited and published in Latin America, INTERCIENCIA is sponsored by scientific organizations of six countries

... produced under the editorial direction of Dr. Marcel Roche, Senior Investigator of the Venezuelan Institute of Scientific Research (IVIC), and a regional board of editors including Dr. Philip Abelson, editor of *Science* (United States), and Dr. Luis Estrada, editor of *Naturaleza* (Mexico)

... an exciting new journal for everyone concerned with the growth and understanding of science in the Americas!

For correspondence with the Editor, please write Marcel Roche, INTERCIENCIA, Apartado 51842, Caracas 105, Venezuela.

First issue appeared May–June 1976. Published six times a year. Subscribers from North America may use the following:

Please enter my subscription for one year (six issues) of INTERCIENCIA.
[Make check payable to INTERCIENCIA Association and mark one box below.]

- [ ] I am a member of AAAS and attach my check or money order for $10.00.
- [ ] I attach my check or money order for $15.00 (other individual subscription).
- [ ] Our purchase order for $20.00 is attached (institutional subscription).

Our Combi-V-Vial is a little thing within a little thing. But it's a big help when you order, say, 50µl of high specific activity radiochemical.

The inner little thing is a nested V-shaped reservoir that lets you capture the small volume of liquid with minimum waste. The outer little thing is a secure system of seals, consisting of a teflon-lined rubber septum (which is easily removed for pipetting), a screw-cap, and a shrink-sealed plastic sheath.

The Combi-V-Vial is unique in safety and convenience, another reason to make New England Nuclear your source for radiochemicals.

In tracer methodology, it's the little things that count.
A thin-film integrated circuit may be thought of as a road map on which active electronic components (the towns) are linked together by conducting paths (the roads).

In a simple circuit, these paths can be laid out on the same plane. But as circuit complexity increases, some conducting paths must span others in bridge-like constructions that are called crossovers.

Engineers at Western Electric's Engineering Research Center in Princeton, N.J., have developed an improved method for simultaneously constructing thousands of crossovers on a single circuit. In addition to lowering manufacturing costs, the new technique has given Bell Labs engineers even greater freedom in designing thin-film circuits.

Until recently, most crossovers were plated directly on a patterned ceramic circuit board. But plated crossovers are very delicate. And unrepairable defects mean that a relatively expensive patterned circuit board has to be discarded.

In the new batch bonding technique, an array of crossovers is fabricated on a separate film. They are transferred to a patterned circuit board only after inspection has assured the array is good.

A reusable metal sheet with tiny slits at the desired crossover locations is basic to the new technique. A copper-plastic laminate is glued to the metal sheet with the plastic side against the metal surface. Short, narrow gold lines are electroplated onto the copper side in registration with the slits in the sheet. The copper not gold plated is etched away, leaving an array of gold-plated copper lines on the plastic film.

Applying pressure to this array with a rubber pad forms the gold lines into tiny arches, by pushing them slightly into the openings in the metal sheet. After inspection, the entire array of good arches can be bonded to a patterned thin-film circuit board.

**Benefit:** Batch bonded crossovers are one more manufacturing innovation that allows the Bell System to meet your communication needs reliably and economically.

For more information, send a large, self-addressed envelope with 24¢ postage affixed to: Advertising Manager, Western Electric, Room 1626, 195 Broadway, New York, N.Y. 10007.
Few members of the scientific and engineering communities know the answers to these crucial questions, even though the future of their projects, their programs and institutions, and even whole fields of science or technology will be heavily influenced by government funding for R & D. RESEARCH AND DEVELOPMENT IN THE FEDERAL BUDGET: FY 1977 is a report and commentary by an experienced former budget official. It provides current and authoritative treatment of R & D in the federal budgeting process, with important information for scientists, engineers, research institutions, administrators, and students of public policy. In the changing climate of government support for R & D, this book is essential reading. Order your copy now, and receive it soon after publication in August.
