Central heating plant, Västra Frölunda—near Gothenburg, Sweden—supplies heat to 1600 apartments in the Swedish community. Central heating plants save energy compared with individual boilers, and can often burn fuels such as trash. See page 1001. [Swedish Information Service, New York City]

American Association for the Advancement of Science was founded in and incorporated in 1874. Its objects are to promote the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the products of science in human progress. Postmaster: Send Form 3579 to SCIENCE, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005.
