Teton Dam Verdict: A Foul-up by the Engineers
The Rockefeller University: No Time for Philosophers
Critical TVA Scholarship Hard to Come By

RESEARCH NEWS
Astrophysics: Discovery and the Ubiquity of Black Holes

BOOK REVIEWS
Meaning in Anthropology, reviewed by M. J. Swartz; The Insect Integument, J. Lai-Fook; The Genetics of Algae, R. Sager; Marine Mussels, M. J. Greenberg; General Relativity and Gravitation, D. M. Eardley; Books Received
Azaarenes in Recent Marine Sediments: M. Blumer, T. Dorsey, J. Sass

Biological Consequences of the 1975 El Niño: T. J. Cowles, R. T. Barber, O. Guillen

Oncornavirus: Isolation from a Squirrel Monkey (Saimiri sciureus) Lung Culture: R. L. Heberling et al.

Sodium-Specific Membrane Channels of Frog Skin Are Pores: Current Fluctuations Reveal High Turnover: B. Lindemann and W. Van Driessche

Size Limit of Molecules Permeating the Junctional Membrane Channels: I. Simpson, B. Rose, W. R. Loewenstein

Primary Structure of Cholera Toxin β-Chain: A Glycoprotein Hormone Analog?: A. Kurosky et al.

Leucine 2,3-Aminomutase: A Cobalamin-Dependent Enzyme Present in Bean Seedlings: J. M. Poston

Plasma Membrane: Rapid Isolation and Exposure of the Cytoplasmic Surface by Use of Positively Charged Beads: B. S. Jacobson and D. Branton

Lateral Diffusion in Planar Lipid Bilayers: P. F. Fahey et al.

Developmental Dyslexia: Two Right Hemispheres and None Left: S. F. Witelson

From Piecemeal to Configurational Representation of Faces: S. Carey and R. Diamond

Erythrocyte membranes attached to polylysine-coated polyacrylamide beads (2000 : 1). The positively charged beads facilitate isolation of cell membranes whose protoplasmic surfaces are fully accessible to further probing. See page 302. [B. S. Jacobson and D. Branton, Harvard University, Cambridge, Massachusetts]
