EDITORIAL  Electronics Revolution .......................................................... 1085

ARTICLES  Introduction to the Continuing Revolution

The Electronics Revolution: P. H. Abelson and A. L. Hammond .............. 1087
Electronics: Past, Present, and Future: J. R. Pierce .......................... 1092
Evolution of Computers and Computing: R. M. Davis ....................... 1096
Large-Scale Integration: What Is Yet to Come?: R. N. Noyce ............... 1102

The Pervasiveness of Electronics

Computers in Banking and Marketing: F. E. Balderston, J. M. Carman, A. C. Hoggatt ............................................................... 1115
The Impact of Integrated Electronics in Medicine: R. L. White and J. D. Meindl . 1119
Satellite Communications: B. I. Edelson and L. Pollack ................... 1125
Computers and Research: W. O. Baker et al. .................................... 1134
Impact of the Electronics Revolution on Industrial Process Control: L. B. Evans . 1146
Electronics and National Defense: A Case Study: G. P. Dinneen and F. C. Frick ................................................................. 1151
Some Recent and Future Automotive Electronic Developments: T. O. Jones ............................................................... 1156
Electronic Mail: R. J. Potter

Policy Problems

The Convergence of Computing and Telecommunications Systems: D. Farber and P. Baran

The Information Economy and Public Policy: M. R. Irwin and S. C. Johnson

International Trade in Electronics: U.S.–Japan Competition: J. Walsh

Computers and People

What Computers Mean for Man and Society: H. A. Simon

Trends in Computers and Computing: The Information Utility: S. E. Madnick

Software Engineering: H. D. Mills

Human Performance Considerations in Complex Systems: H. O. Holt and F. L. Stevenson

Research Frontiers

Photons in Fibers for Telecommunication: S. E. Miller

New Memory Technologies: J. A. Rajchman

Physical Limits in Semiconductor Electronics: R. W. Keyes

Solid-State Electronics: Scientific Basis for Future Advances: J. A. Giordmaine

American Association for the Advancement of Science was founded in and incorporated in 1874. Its objects are to foster the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the finds of science in human progress.
