LETTERS

EDITORIAL
The Recombinant DNA Debate: M. F. Singer .... 127

ARTICLES
The Need for a New Medical Model: A Challenge for Biomedicine: G. L. Engel .... 129
Second Phases in Steel: W. R. Bandi .... 136

NEWS AND COMMENT
NSF: Pressures Mount to Provide Grants for Industrial Researchers .... 142
Mathematician Paul Erdős: Total Devotion to the Subject .... 144
Science in Europe/Benn and British Rethink Energy Policy .... 146
Science and Technology at State: Recognizing the Problem .... 148

RESEARCH NEWS
Persistent Infections: The Role of Viruses .... 151

BOOK REVIEWS
Jupiter, reviewed by J. W. Warwick; Patterns of Human Variation, M. H. Crawford; Science and Civilisation in China, P. M. Rattansi; Discrete Multivariate Analysis, J. Olkin; The Ethology of Predation, T. W. Schoener; Books Received and Book Order Service .... 153

REPORTS
Recombinant DNA: Examples of Present-Day Research: J. Abelson .... 159
Charon Phages: Safer Derivatives of Bacteriophage Lambda for DNA Cloning: F. R. Blattner et al. .... 161
Recombinational Switch for Gene Expression: J. Ziegl et al. .... 170
EK2 Derivatives of Bacteriophage Lambda Useful in the Cloning of DNA from Higher Organisms: The AgtWES System: P. Leder, D. Tiemeier, L. Enquist .... 175
Chemical Synthesis of Restriction Enzyme Recognition Sites Useful for Cloning: R. H. Scheller et al. .... 177
Screening Agt Recombinant Clones by Hybridization to Single Plaques in situ: W. D. Benton and R. W. Davis .... 180
Use of Phage Immunity in Molecular Cloning Experiments: K. Backman, D. Hawley, M. J. Ross ..................................................... 182
Hybridization in situ of SV40 Plaques: Detection of Recombinant SV40 Virus Carrying Specific Sequences of Nonviral DNA: L. P. Villarreal and P. Berg .................................................... 183
Increase in Conjugal Transmission Frequency of Nonconjugative Plasmids: N. J. Crisola and A. J. Clark ........................................ 186
Five Hundredfold Overproduction of DNA Ligase After Induction of a Hybrid Lambda Lysogen Constructed in vitro: S. M. Panasenko et al. .............................................................. 188
Interspersion of Short Repetitive Sequences Studied in Cloned Sea Urchin DNA Fragments: A. S. Lee, R. J. Britten, E. H. Davidson ........ 189
Nucleotide Sequences from a Rabbit Alpha Globin Gene Inserted in a Chimeric Plasmid: A. Y. Liu et al. .................................................. 192
Analysis of Chicken Ribosomal RNA Genes and Construction of Lambda Hybrids Containing Gene Fragments: W. McClements and A. M. Skalka .................................................. 195
Clones of Individual Repetitive Sequences from Sea Urchin DNA Constructed with Synthetic Eco R1 Sites: R. H. Scheller et al. ....... 197
Cloned Ribosomal RNA Genes from Chloroplasts of Euglena gracilis: M. I. Lomax et al. ................................................................. 202
Cloning of Yeast Transfer RNA Genes in Escherichia coli: J. S. Beckmann, P. F. Johnson, J. Abelson .............................................. 205
Excision and Recombination of Adenovirus DNA Fragments in Escherichia coli: M. Perricaudet et al. ............................................... 208
Cloning of Cauliflower Mosaic Virus (CLMV) DNA in Escherichia coli: W. W. Szeto et al. ............................................................... 210
The Effects of Escherichia coli and Yeast DNA Insertions on the Growth of Lambda Bacteriophage: J. R. Cameron and R. W. Davis .................. 212
Use of Isolators in Recombinant DNA Research: P. Kourilsky .......................................................... 215
Degradation of DNA by Nucleases in Intestinal Tract of Rats: L. Maturin, Sr., and R. Curtiss III ................................................................. 216
Probability of Establishing Chimeric Plasmids in Natural Populations of Bacteria: B. R. Levin and F. M. Stewart ......................... 218
Intercellular Transfer of Escherichia coli—Drosophila melanogaster Recombinant Plasmids: D. H. Hamer .............................................. 220

PRODUCTS AND MATERIALS

Chemical Carcinogen Glove Box; Storage Cabinets for Flammables; Modulation Contrast System; Infrared Spectrophotometers; Ultrasonic Cup Horn; Measurement of Atmospheric Electricity; Bench-Top Chemostat; Organic Carbon Analyzer; Disposable Water Dispensers; Skeletal Vascular Casting; Back-Lighted Digitizers; Electronic Balances; Gas Chromatographs; Vertical Slab Polyacrylamide Gel Electrophoresis; Data Recording System; Literature ................................................................. 222

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE was founded in 1848 and incorporated in 1874. Its objects are to further the work of the sciences, to facilitate cooperation among them, to improve the effectiveness of science in the solution of human welfare, and to increase public understanding and appreciation of the importance and promise of the role of science in human progress.
