American Men and Women of Science

A landmark in biographic achievement, American Men and Women of Science is one reference work that belongs in all academic and public libraries and science-oriented institutions.

The new 13th Edition includes concise profiles of 110,000 American and Canadian scientists working or teaching in over 1,000 areas of the physical and life sciences and selected social sciences. In seven volumes, AMWS covers all institutional levels of scientific activity-university, industry, foundation, and governmental. Each entry includes: full name and address, discipline, area(s) of research specialization, professional experience, memberships, place and date of birth and other personal data. Separate discipline and geographic indexes are included for rapid access to individuals.

Encyclopedic in scope and meticulously compiled, American Men and Women of Science is a reference work of superior quality... an essential addition to all libraries having to provide current information on today's scientific activity.

Complete seven volume set...$300. Individual volumes...$50.
2nd Annual AAAS Colloquium on

R&D in the Federal Budget

15-16 June

Sheraton National Motor Hotel
Columbia Pike & Washington Blvd.
Arlington, Virginia

Based on the forthcoming report “R&D in the Federal Budget: FY 1978” (copies will be provided to registrants).

The colloquium will provide a forum for constructive discussion of selected topics in the report, including future trends in R&D budgeting, the congressional role in R&D budgeting, and problems in rationales and criteria for R&D budget decisions.

Featured speakers and panelists will include appropriate officials from the Executive Branch, Members of Congress, and leading figures in the scientific, technical, and public policy communities.

PRELIMINARY AGENDA

Wednesday, 15 June
10:00 a.m. Opening session; opening address.
12:30 p.m. Lunch; major address.
2:30 p.m. R&D Budgets and Future Outlook. This session will consider current budgets and future outlook for R&D. Selected speakers, panelists, and participants will address major issues in the FY 1978 budget; the trends and 5-year outlooks for federal R&D; and their implications for national needs, scientific progress, and R&D institutions.
5:30 p.m. Reception and buffet dinner; major address.
7:30 p.m. Congressional Role in R&D Budgeting. This session will address questions of current interest regarding the role of Congress, its committees, and associated agencies in R&D budgeting. Discussion will focus on the congressional vs. the executive role; the proper balance and degree of control over R&D programs; problems and limitations; and effective interaction between scientific and technical communities and the Congress.

Thursday, 16 June
10:00 a.m. How Should R&D Decisions Be Made? This session will attempt to develop a consensus among representatives of the scientific and technical community, the Executive Branch, and the Congress on how R&D budget decisions should be made. Issues to be addressed will include conditions to be met and avoided, a “straw man” conceptual system of processes, criteria for R&D budget decisions, and unresolved questions that require attention.
1:00 p.m. Lunch; major address; closing of program.

Colloquium Registration Form*

- $40 Single Registration (includes FY78 report and Proceedings of Colloquium)
- $7 Lunch on Wednesday, 15 June
- $11 Buffet Dinner on Wednesday, 15 June
- $7 Lunch on Thursday, 16 June
- $15 Single Student Registration (full-time graduate or undergraduate; does not include report or proceedings)
- $10 Copy of previous report (FY77) and Proceedings of first Colloquium (1976)

*Check appropriate boxes and return this form with separate check for above amount. Make check payable to AAAS.

Hotel Reservation Form

Sheraton National Motor Hotel

- Single Room $33
- Double Room $41

Announcement

The Franklin Institute Press is establishing a new, primary journal:

THE JOURNAL OF NUTRITION AND CANCER

to be published beginning in the Fall of 1977. This new, refereed publication will have the support of a distinguished editorial board and feature initial publication of the following:

- Original Papers and Articles
- Abstracts of Current Literature
- News Briefs
- Announcements of Meetings and Symposia

Information will be made available prior to publication via an on line data base.

Interested persons are invited to write the editors c/o The Franklin Institute Press, Box 2266, Philadelphia, Pennsylvania 19103

SOFT ENERGY PATHS
Toward a Durable Peace
Amory B. Lovins, Friends of the Earth, Inc. (Published for Friends of the Earth, Inc.)
Based on his 1976 article in Foreign Affairs—which Energy Daily called "a seminal chapter in the history of energy policy"—Mr. Lovins proposes a coherent non-nuclear energy policy. Previous books have treated specialized topics piecemeal—energy conservation, alternative technologies, nuclear concerns, and the structural problems of our society. This book, for the first time, ties all the issues together—engineering, economic, and thermodynamic concepts are thoroughly but concisely treated along with the social, environmental, and political perspectives.

In preparation ca. $15.00 (cloth)
ca. $6.95 (paper)

NUCLEAR POWER ISSUES AND CHOICES
The Nuclear Energy Policy Study Group, Spurgeon Keeny, Jr., Chairman
Foreword by McGeorge Bundy (Published for the Ford Foundation)
Prepared by a distinguished group of scientists and economists, this report is a comprehensive analysis of nuclear power economics. Setting aside "optimistic" assumptions about the potential savings of energy conservation, it concludes that our economy can provide adequate energy in the future without major social or economic changes. And, if there are overriding noneconomic reasons for a delay in developing nuclear power, the economy could bear the costs.

(Cloth) $16.50 (Paper) $6.95

ENERGY FUTURES
Industry and the New Technologies
Inform, Inc.
A meticulously compiled summary of alternative energy source research and activity within American corporations. Using concise and non-technical prose, the report profiles over 200 major R&D projects of 142 firms in 17 new technology areas. (Published by Ballinger for Inform, Inc.) $45.00

INTERNATIONAL ARRANGEMENTS FOR NUCLEAR FUEL PROCESSING
Abram Chayes, Harvard Law School and W. Bennett Lewis, Queens University, Editors (Published for the American Academy of Arts and Sciences)
Papers presented at the International Pugwash Symposium—these multidisciplinary reports focus on the technical, political, and economic issues in multinational control of the nuclear reactor fuel cycle. $16.50

ARID ZONE DEVELOPMENT
Potentialities and Problems
Edited by Yair Mundlak, Hebrew University of Jerusalem and S. Fred Singer, University of Virginia (Published for the American Academy of Arts and Sciences)
Presented at a Symposium marking the 50th anniversary of the Hebrew University of Jerusalem, these papers extend beyond a technical review of research to explore the possibilities for effecting fundamental changes in arid land conditions and use. $17.50

Ballinger
PUBLISHING COMPANY
17 Dunster Street Cambridge, MA 02138
AAAS brings you outstanding publications on the critical issues of today... a series of Compendium Volumes that includes authoritative articles originally published in SCIENCE — articles you would have clipped for future reference if you knew then what the critical issues of today would be — articles you will want to assign your students for background reading, or use to supplement your own professional library... Each compendium is available in your choice of casebound or paperbound edition. Order one—or all of them—today!

**ENERGY:** Use, Conservation, and Supply
A collection of enduring and readable articles on problems in the use of energy for food production and distribution; the potential of oil, coal, gas, and uranium for meeting present and future energy needs; long-term optional energy sources such as geothermal and solar energy and the possible use of methanol as a supplement to or substitute for dwindling gasoline supplies. This compendium provides a wealth of information for individuals as well as those in industry.

**POPULATION:** Dynamics, Ethics, and Policy
The ethics of choice... the interrelationship of population size and economic development... the consequences of population growth—such are the issues debated in this collection of outstanding articles, research reports, and policy debates. The papers provide a close look at population research as conducted and reported by American scientists, as well as a glimpse at the continuing debate between those who advocate different methods of contraception and population control.

**FOOD:** Politics, Economics, Nutrition, and Research
This report is essential reading for everyone concerned with the serious problems we face in meeting the world's food needs. It contains thirty-one articles on the perspectives and politics of the world food situation, the nutritional aspects of world food problems, and the impact of agricultural and biological research on food production and availability. Together these articles provide a provocative reassessment of the worldwide food crisis and a realistic look at our options for the future.

**MATERIALS:** Renewable and Non-renewable Resources
An important exploration of the new set of realities affecting the flow of raw materials. This compendium probes the implications of national policy, energy constraints, environmental considerations on materials production and use, the perspectives in needs and supplies of resources, high technology materials, and renewable and reusable resources. Essential reading for everyone concerned with materials issues and their import for the health of industrial economies, the future of materials research, and, ultimately, the quality of life.

Price for each Compendium: Retail: $12.95 casebound, $4.95 paperbound; AAAS Member: $11.95 casebound, $4.45 paperbound.
