BOOK REVIEWS

Influenza and Influenza, reviewed by R. W. Schlesinger; Neural Principles in Vision, P. Witkovsky; Calcareous Algae, W. H. Adey; The Genus Epilobium (Onagraceae) in Australasia, S. Carlquist; Books Received
Concorde Sonic Booms as an Atmospheric Probe: N. K. Baluchandran, W. L. Donn, D. H. Rind ........................................... 47
Shoreline Forms and Shoreline Dynamics: R. Dolan et al. .................................................. 49
Somali Current: Recent Measurements During the Southwest Monsoon: J. G. Bruce ........ 51
Estimates of Cenozoic Oceanic Sedimentation Rates: T. A. Davies et al. ......................... 53
Antarctic Soft-Bottom Benthos in Oligotrophic and Eutrophic Environments: P. K. Dayton and J. S. Oliver ........................................... 55
Netschaëvo: A New Class of Chondritic Meteorite: R. W. Bild and J. T. Wasson ............. 58
Crocodile with Laterally Compressed Snout: First Find in Australia: R. E. Molnar .............. 62
Angiotensin Converting Enzyme: Induction by Steroids in Rabbit Alveolar Macrophages in Culture: J. Friedland, C. Setton, E. Silverstein ........................................... 64
2-Deoxy-α-ecdysone from Ovaries and Eggs of the Silkworm, Bombyx mori: E. Ohnishi et al. .................................................. 66
Transmitter Release During Repetitive Stimulation: Selective Changes Produced by Sr²⁺ and Ba²⁺: J. E. Zengel and K. L. Magley .................................................. 67
Cardiac Glycosides in the Defensive Secretion of Chrysomelid Beetles: Evidence for Their Production by the Insects: J. M. Pasteels and D. Daloze .................................................. 70
Freeze-Fractured Purple Membrane Particles: Protein Content: K. A. Fisher and W. Stoeckenius .................................................. 72
Intravenous Naloxone Administration in Schizophrenia and Affective Illness: G. C. Davis et al. .................................................. 74
Androgen Concentration in Motor Neurons of Cranial Nerves and Spinal Cord: M. Sar and W. E. Stumpf .................................................. 77
Stereopsis in the Falcon: R. Fox, S. W. Lehmkuhle, R. C. Bush .................................................. 79
Homosexual Rape and Sexual Selection in Acanthocephalan Worms: L. G. Abele and S. Gilchrist .................................................. 81
Morphine and Enkephalin: Analgesic and Epileptic Properties: G. Urca et al. ..................... 83
Efferent Optic Nerve Fibers Mediate Circadian Rhythms in the Limulus Eye: R. B. Barlow, Jr., S. J. Bolanowski, Jr., M. L. Brachman .................................................. 86
Physiological Evidence for Habenula as Major Link Between Forebrain and Midbrain Raphe: R. Y. Wang and G. K. Aghajanian .................................................. 89
Circadian Rhythm of Synaptic Excitability in Rat and Monkey Central Nervous System: C. A. Barnes et al. .................................................. 91

Sonic booms from supersonic transports such as the Concorde may be used to probe the upper atmosphere. Acoustic signals of relatively high amplitude and low frequency, generated by the sonic booms, are reflected from both the stratosphere and the thermosphere and can be used to determine temperature and wind conditions at the reflection levels. See page 47. [British Aircraft Corp./Aerospatale France]
