A symposium currently in the planning stage is scheduled for mid-March 1978 in Brazil. The focus will be on non-conventional energy resources and the relationships between energy supplies, development, and appropriate technology. Plans for the conference were first discussed at an Interciencia workshop at the Denver Annual Meeting of AAAS. Attendees there expressed concern over the threat to development plans posed by increased costs of conventional energy sources, the questionable relevance of much conventional technology, and the need for cooperation on energy strategies and research.Spokespersons for the IA have expressed hope that, in addition to providing an exchange of information on the state of the art in nonconventional energy sources, the meeting will provide a useful input at the regional level for the United Nations Conference on Science and Technology, scheduled for 1979. Preliminary program plans for the 1978 Interciencia symposium include such topics as major problems of Latin America which bear on needs for energy; assessment of major energy resource potentials of Latin America with emphasis on which of these can be developed rapidly; energy for rural peoples; impact of energy choices on urbanization and employment; potential of biomass; and mechanisms for transfer of appropriate energy technologies.

A broad range of institutions and individuals are being encouraged to provide input to the symposium plans. AAAS members and members of affiliated societies are urged to contact the executive secretary, Interciencia Association, 1515 Massachusetts Avenue, NW, Washington, D.C. 20036.

COOS Sets Priorities at June Meeting

Energy and water resources on Indian lands—the attrition rate of women in undergraduate and graduate science curricula—Puerto Rican representation among the science professions—minority representation among AAAS committees—these were areas of high priority identified by members of the AAAS Committee on Opportunities in Science (COOS) at its meeting 3 and 4 June in Washington, D.C.

The Committee felt that AAAS could take steps in two areas where energy resources and water on Indian lands are concerned: first, inform the scientific and technological community as to the concerns of American Indians in this area, such as exploitation of Indian lands and the legal issues involved. Second, AAAS should work with Indian organizations and communities to facilitate their identification of needs for technology and human resources.

A question in which the Committee expressed interest is the difference between attrition rates of men and women in science curricula at both the undergraduate and graduate levels. Identifying the reasons for the disparity in the drop-out rates of men and women may lead to more women completing their science education.

The Committee members reiterated their interest in pursuing funding for projects that would seek to identify minority women professionals, especially below the Ph.D. level. Such a project could help in the establishment of regional meetings and result in local networks for communication among those already established in professions, as well as those still in school. Members of COOS felt a need for a regular newsletter that would report activities of other minority groups, policy developments in Washington, and funding possibilities.

Two Puerto Rican members of the Committee, participating in their first meeting, called for help from AAAS in identifying their human resources on the mainland. They urged the Association to work with Puerto Rican organizations to gather data on both science professionals and graduate students, in order to better assess their needs.

A discussion during the meeting of the controversial fellowship nomination of Arthur Jensen evolved into a discussion of the fellowship nomination procedure and the drafting of a request to the Board of Directors. In it, the Committee described the nomination as damaging to the credibility of the Association, and recommended revision of the fellows nomi-

(Continued on page 93)
nation process to protect against recurrence of the incident. Vital to such a revision would be adequate representation of minorities, women, and the handicapped in the nomination process.

Report on Federal Impact Workshop
Available from SMC

The report of a workshop on the impact of federal programs and policies on manpower planning for scientists and engineers has been published by the Scientific Manpower Commission (SMC), a participating organization of AAAS.

The workshop, conducted by the SMC and the Manpower Analysis and Planning Society of Washington, D.C., on 31 March to 1 April 1977 in Arlington, Virginia, provided an opportunity for exchange of information and insights among people both in and out of the government who implement, regulate, or enforce federal mandates on the labor market for scientists and engineers.

Representatives of federal, state, and local government agencies, educational associations, private employers, professional societies, women and minorities, and public interest groups discussed such issues as data collection efforts in the private and government sectors; the impact of federal funding and policies on the education and employment of scientists and engineers; the difficulty in making projections of supply and demand in science and engineering in terms of fluctuations in the job market; the parallel problem of changing federal policies and public attitudes toward science; and the current and future role of women and minorities in science and engineering in light of affirmative action and of changing societal expectations of their education and career choices.

Conclusions and recommendations ensuing from these discussions and summaries of individual presentations are included in a 56-page report entitled Manpower Planning for Scientists and Engineers, available for $2, prepaid, from the Scientific Manpower Commission at the AAAS address. Also available from the same source for $1.50 is the background report for the workshop, entitled Supply and Demand for Scientists and Engineers—A Review of Selected Studies, by Betty M. Vetter.

CLEARANCE

AAAS is having a sale. All of our 1969-1975 annual meeting audiotapes must be sold.

With prices slashed at least 1/3 off, you can buy several audiotapes for either personal or classroom use. Annual meeting tapes are recorded in sessions: some tape titles have only one session; others might have two or more sessions. Our sale prices are $12 a session for cassette recordings or $6 a session for open reel tapes.

Only a limited number of tapes are available in the following subjects:

BIOLOGICAL SCIENCES CHEMISTRY ENGINEERING
EARTH SCIENCES INFORMATION AND COMMUNICATION
MATHEMATICS AND LOGIC MEDICAL SCIENCES
PHYSICAL SCIENCES PSYCHOLOGY ANTHROPOLOGY
ECOLOGY ECONOMICS SOCIOLOGY EDUCATION

We don't have enough space to list all 149 titles, but you can find the information in the 1976 AAAS audiotapes brochure. If you don't have a brochure, write to AAAS Audiotape Program, 1515 Massachusetts Avenue, N.W., Washington, D.C. 20005.

Personnel Placement

Personnel advertising is accepted only with the understanding that the advertiser does not discriminate among applicants on the basis of race, sex, religion, age, color, or national origin.

Positions Wanted: 40¢ per word; $10 minimum charge, per insertion. $4 extra for use of box number. Prepayment required. Rate available only to individuals; personal agencies, companies, colleges, and universities take display rate for all advertising.

Display (Positions Open, Market Place, and so forth): $1.50 per 25 millimeters (1 column inch), minimum per insertion (25 millimeters equals 10 lines of 50 space characters each). Ads over 25 millimeters billed at $5.80 per millimeter. No charge for use of box number. Rates net. No agency commission for ads under 4 inches. No cash discount. Payment required for foreign advertising. Purchase orders and billing information required for all other ads.

Advertising closing is each Wednesday, 3½ weeks before Friday issue date requested. Send copy for all position wanted ads and display ads under 5 inches to:

SCIENCE, Room 207
1515 Massachusetts Ave., NW
Washington, D.C. 20005
Telephone: 202-467-4456

Send copy for display ads, 1/6 page and larger, to:

Science Associates, Inc.
11 West 42nd Street
New York, N.Y. 10036
Telephone 212-716-1858

Blind Ad replies should be addressed as follows:

Box (give number) 1522
SCIENCE
1515 Massachusetts Ave., NW
Washington, D.C. 20005

Positions Wanted

Microbiologist—Biochemist, Ph.D. Postdoctoral research experience in separation of small molecules-polymamines. Doctoral research experience in biochemical genetics. Glycoprotein enzyme regulation and purification. Some clinical laboratory experience. Teaching in microbiology, genetics, and general biology. Seeks teaching, research, or administrative position. Box 260, SCIENCE.

An experienced Neurobiologist—Neurophysiologist, M.D., principal investigator, and faculty member at medical school, seeks research or academic position. Grants. Publications. Box 261, SCIENCE.

Research Assistant/Technician desires challenging position in United States/Canada. Firm background in the molecular biology of embryonic chick muscle development. Excellent publications, references. M.Sc. initiated and executed without supervision (advisor abroad). Box 263, SCIENCE.
