This new development offers you these five important advantages.

2. New antibody significantly lowers cross-reactivity to 11-deoxycortisol.
3. Direct sample processing; no heat denaturation, no dilution.
4. Employs a new tracer with higher count rate.
5. Eliminates the need to wash tubes after aspiration or decantation.

Introducing the hungry ECLIPSE.

Data General’s new ECLIPSE S/130 computer has a bigger appetite for work than any other mid-range mini. And enough speed and versatility to wolf down any kind of data you have to dish out.

The hungry ECLIPSE computer is built around the same powerful architecture as our super high-speed ECLIPSE S/230. Added to that is a host of special features that make the hungry ECLIPSE unique. Like our fast micro-coded floating point and efficient character string instruction sets. And our second-generation WCS general-purpose user microprogramming ability that results in unmatched throughput in demanding applications. To top it off it also includes AOS, our amazing new heuristic multi-programming advanced operating system, and of course the full range of Data General’s economical big-computer peripherals, software and worldwide support.

Now, you don’t have to skimp along with an undernourished mini that’s too limited for your work. Or splurge on one that’s too fat just to get the performance you need. Just order an ECLIPSE S/130 computer. It will make your work load a lot leaner. Want more food for thought? Send for our brochure.

Send your S/130 brochure.
Send your S/130 brochure and have your sales representative call.

Data General
It’s smart business.

Data General Europe, 15 Rue Le Sueur, Paris 75116, France. Data General Australia, Melbourne (03) 82-1361.
The universal Teflon® dispenser.

It works as smoothly with alkalis as with acids.

Dispensette is the universal bottle-top dispenser that does lots of things better than conventional all-glass dispensers; dispensing alkaline solutions without sticking or 'freezing' is one of them.

On a Dispensette, the plunger is Teflon coated to insure smoother movement inside the precision-ground borosilicate glass cylinder. The flexible filling tube and curved discharge tip are also Teflon, eliminating external glass tubing that could break off, chip or crack. (And either tube can easily be cut to any desired length).

There's a wide choice of adjustable and fixed-volume Dispensettes for fast, accurate dispensing of exact volumes from 0.1 to 50ml with better than ±1.0% accuracy and ±0.1% reproducibility. All can be autoclaved at 120°C without disassembling. All mount directly on 33mm screw-neck reagent bottles, and on most other size bottles, cans or containers (including STJ 24/40 and STJ 29/42 glassware) using optional screw-in adapters. Dispensettes work smoothly with all reactive chemicals (except HF), including concentrated alkalis.

For literature on the smoothest working, least fragile universal dispenser yet designed, just write: Brinkmann Instruments, Cantague Road, Westbury, N.Y. 11590.
In Canada: 50 Galaxy Boulevard, Rexdale, Ontario M9W 4Y5.

Dispensette® is a registered trademark of R. Brand Co., Teflon® is a Du Pont trademark.
How to extend the useful life of microparticle HPLC columns up to four times.

If you use our HPLC Column Survival Kit you can increase the useful life of your microparticle column as much as 400% and, depending upon your samples, perhaps even more.

Further, use of the Survival Kit has no significant effect on microparticle column efficiency, peak symmetry or back pressure. And the Kit can be used with any commercial microparticle column, Whatman or brand X.

Essentially the Kit consists of two guard or pre-columns and a supply of pellicular packing whose functionality is the same as that of your microparticle column. Each Kit includes 10g of any one of five pellicular packings: Silica Gel, Reversed-Phase, Cyano Bonded Phase, Anion Exchanger, Cation Exchanger. All are easily dry-packed. The "hardware" for instant assembly and connection is complete for either ¼" or ⅛" OD microparticle columns including a zero dead volume union, frits, nuts, ferrules. Instructions for use are also included. Additional pellicular packings may be ordered at any time.

The Kit is ready for use in less than five minutes. It can also improve column resolution, serve in collection of specific compounds, and be used as an adaptor for a syringe injector for our Magnum 9 semi-prep columns.

The HPLC Column Survival Kit.
Column life times four.

From WHATMAN INC. ■ 9 Bridewell Place, Clifton, N.J. 07014 ■ (201) 777-4825.

NEW GALLEN MICROSCOPE

Your slides have never looked so good.

Look at your own slides through our new GALLEN microscope and see how clear and fine the detail is. And notice that you get full 2" x 3" coverage. Named after the famous Greek physician, GALLEN meets exacting Bausch & Lomb standards.

This fine instrument is ideal for routine work in colleges, hospitals and industrial labs. And it meets all specifications required for a microscope used to study medicine.

The GALLEN microscope is priced at $746.00*, considerably less than many microscopes that don’t have all its features.

We think this is the best microscope value on the market today. But don’t take our word for it. Arrange for a free demonstration.

Look into GALLEN when you’re looking for a microscope:
- Parfocal, coated optics.
- 4x, 10x, 40x, 100x (oil) achromatic objectives.
- Monocular, binocular, triocular models.
- In-base, variable control illuminator (30-watt).
- Ideal for brightfield, darkfield and phase contrast observations.
- Observation body rotates 360°, locks at any point.
- Precentered substage with convenient low rack-and-pinion focusing.
- Graduated mechanical stage; low, coaxial controls.
- Immediate off-the-shelf delivery.
- Bausch & Lomb guarantee, and nationwide service.

GALEN. The scope of a more productive laboratory.

Available on GSA contract. Consult the Yellow Pages for your local authorized Bausch & Lomb dealer.
Meet fifteen new Olympus Microscopes:

The universal research microscope VANOX

Olympus meets change with change, and offers you the most flexible research microscope ever. Its rugged, modern, square-line stand contains a wide choice of application-oriented options that let you modify its configuration to suit your own use. You choose from four light sources, bright field or dark field contrast, phase contrast, fluorescence, from achromats to plan apochromats three stages, interference contrast—transmitted and reflected light. The new Olympus VANOX modular concept increases your opportunities to build a system around your own requirements by providing a complete range of Olympus accessories. They include objective lens combinations and modular attachment camera systems that can be used with other Olympus microscopes. An economy without sacrificing quality. Find out how you can give your lab ultimate capabilities. Your Olympus dealer can give you more details.

NOW AVAILABLE

DIAZEPAM [3H]

SPIRORPERIDOL [3H]

High specific activity

Ligand for neurochemical brain studies:

**Diazepam**, [methyl-3H]-
30-60Ci/mmol
Ethanol.
NET-564 $100/250μCi $250/1mCi

Ligand for the dopamine receptor:

**Spiroperidol**, [1-phenyl-3H(N)]-
20-40Ci/mmol
Ethanol, in dry ice.
NET-565 $100/250μCi $250/1mCi

Not for use in humans or clinical diagnosis
