The names of authors of books reviewed are in **SMALL CAPITALS**.
By adding INFOTEK's field proven accessories, your HP 9830A/B will out-perform any other general purpose desk top system.

Completely compatible with all 9830A/B conventions, our units give your system a combination of speed and versatility superior to any other desk top computer...any make...any model.

The cost is a fraction of what you'd pay for any other approach offering similar capabilities.

32,192-Byte Memory
Where more memory is important, the user area may be increased to 32K bytes with our EM-30...the first and only 16,096-word memory for the 9830A/B! Compared to newly introduced models equipped with commonly used ROM options, the 9830A/B with the EM-30 provides 8,192 bytes more user memory. A truly significant increase in capacity!

With the 9830A/B, the EM-30 provides 2,048 more bytes of memory, is priced right, and is fully warranted for a year.

FAST BASIC ROMS
Infotek's FAST BASIC ROMS add to the machine instruction set where HP left off. These ROMS provide spectacular increases in the work throughput of your 9830A/B. For example, you can process arrays at speeds of 40,000 words per second, attain an I/O capability of 10,000 bytes per second, greatly increase the power of a 9880A/B disk system, and print from a buffer while computing.

By providing 46 additional functions, statements, and commands, the FAST BASIC ROMS give your 9830A/B the most powerful BASIC language repertoire short of $200,000 systems.

If you need FAST BASIC but don't have enough unused ROM slots, don't give up! You can install our FAST BASIC ROMS without losing any present capability. Contact us, we'll show you!

HP 9830A/B with the Infotek FD-30 Mass Memory

Floppy Disk Memory System
The FD-30A provides 305K bytes of on-line data that can be searched 50 times faster than your present cassette system. Data throughput is actually four times faster than the 9880A/B Mass Memory. Best of all, no software modifications are required since the FD-30A obeys all cassette syntax.

The FD-30A is the optimum magnetic memory for the 9830A/B. It has the right capacity, speed, and price.

NEW! The FD-30S low cost Slave Drive for the FD-30A. Multiple slaves can be used with a single FD-30A so you can increase on-line capacity in blocks of 305K bytes. Also, the FD-30S provides one minute disk duplication under program control or stand-alone.

NEW! BP-30 automatic buffered printing. Your '30 will continue program execution while driving a printer as a background task under interrupt control.

Save $2,100
In our Word Processing Package you get the EM-30, FD-30A, FAST BASIC I and III ROMS, and the CP-30, including software, for a special package price of $10,850.

Other 9830A/B Accessory Equipment
RS-30 High Speed RS 232C Interface. Provides seven crystal controlled Baud rates from 150 to 9600/sec.

TC-30 Real Time Clock. Provides time in 10-millisecond increments, is set or read via the OUTPUT and ENTER statements.

LP-30 Heavy Duty Line Printer. A 200 line-per-minute, 128-column printer (128 character set is standard). Comparable in every way to the 9881A, except the LP-30 is lower in price.

CP-30 Correspondence-Quality Character Printer. Provides 14 easily changeable fonts including scientific symbols, UK, German, Scandia, and Cyrillic. Prints and plots at 45 cps.

Contact us direct or through our representatives. Infotek products are sold and serviced through 33 offices in the U.S. and 11 in other countries.

Let us show you how to make your '30 the best desk top computer in the world.

How we fit into
Receptor Site Studies

Steroid Receptor Studies
Dihydrotestosterone, [1,2,4,5,6,7,16,17-3H(N)]-
Dihydrotestosterone, [1,2,4,5,6,7-3H(N)]-
Dexamethasone, [6,7-3H(N)]-
Estradiol, [2,4,6,7,16,17-3H]-
Estradiol, [2,4,6,7-3H]-
Prednisolone, [6,7-3H(N)]-
Progesterone, [1,2,6,7-3H(N)]-
Testosterone, [1,2,6,7,16,17-3H(N)]-
Triamcinolone acetonide, [6,7-3H(N)]-
R5020-3H (manufactured by New England Nuclear under licensed agreement of ROUSSEL UCLAF)

α-Adrenergic Receptor Studies
Dihydroergocryptine, 9,10-[9,10-3H(N)]-

β-Adrenergic Receptor Studies
Dihydroalprenolol hydrochloride, levo-[propyl-2,3-3H]-
Propranolol hydrochloride, DL-[3H(G)]-
Propranolol hydrochloride, levo-[4-3H(N)]-

Cholinergic Receptor Studies
Choline chloride, [methyl-3H]-
(QNB) Quinuclidinyl benzilate, DL-[benzilic-4,4'-3H(N)]-
Tubocurarine chloride, dextro-[13'-3H(N)]-

Dopamine Receptor Studies
Dihydroxyphenylethylamine, 3,4-[ethyl-1-3H(N)]-
Dihydroxyphenylethylamine, 3,4-[ethyl-2-3H(N)]-
Haloperidol, [3H(G)]-
Spiroperidol, [1-phenyl-4-3H]-

Amino Acid Receptor Studies
Aminobutyric acid, y-[2,3-3H(N)]-
Glycine, [2-3H]-

Opiate Receptor Studies
Enkephalin (5-L-methionine), [tyrosyl-3,5-3H(N)]-
Enkephalin (5-L-leucine), [tyrosyl-3,5-3H(N)]-
Enkephalinamide (2-D-alanine-5-L-methionine), [tyrosyl-ring-2,6-3H]-
Dihydromorphine, [7,8-3H(N)]-
Diazepam, [methyl/-3H]-

This is not the end of our list of labeled ligands. Call us for the current status of new compounds in development.

Circle No. 147 on Readers' Service Card
The only rotary evaporator with an air hose instead of an electrical cord.

The explosion-proof Rotavapor 115EX is Büchi/Brinkmann's innovative solution to the hazard posed by sparking electrical motors when working with highly-volatile materials.

The Rotavapor 115EX has no electrical components whatsoever. Instead, its high-torque, variable speed motor is powered by compressed air. Simply connect the 115EX to any air source of 20-100psi and evaporate in safety at speeds from 15 to 270 rpm. Like the electrically-driven Büchi/Brinkmann standard models, the 115EX comes equipped with 1 liter evaporating and receiving flasks and is available with V-stand, quick-action jack, heating bath and a wide selection of other accessories.

Büchi/Brinkmann Rotary Evaporators are unsurpassed in versatility, durability, and safety of operation. In addition to the 115EX, there are eleven electrically-powered models to meet every concentrating need, from 5ml to 50 liters or more (Pilot Plant models). Our new brochure describes them all. Just write: Büchi Division, Brinkmann Instruments, Inc., Cantiague Road, Westbury, N.Y. 11590.

In Canada: 50 Galaxy Blvd., Rexdale, Ont. M9W 4Y5.

Bio-Rad's Affi-Gel Blue, made by coupling a blue dye to crosslinked Bio-Gel® agarose beads, is a highly effective affinity chromatography matrix—supplied ready-to-use! Affi-Gel Blue's strong biospecific affinity for nucleotide-requiring enzymes makes it ideal for purifying kinases, dehydrogenases and more than 30 other nucleotide-binding enzymes.

Another major application for Affi-Gel Blue is the removal of albumin from plasma and serum. Using a simple column technique, Affi-Gel Blue will remove over 95% of the albumin from serum—with little nonspecific adsorption of other serum proteins. The two-dimensional electrophoresis patterns below show this clearly. The pattern on the left, with the large band of albumin, is human serum. The pattern on the right is that same serum pool after passage through an Affi-Gel Blue column.

Bio-Rad supplies Affi-Gel Blue in 50-100 mesh for albumin removal and 100-200 mesh for enzyme purification. It costs only $49.50 for a 100 ml bottle of either mesh size, ready to use.
