CONTENTS:

Meteorology in the University: CLEVELAND ABBE.709
Geologic Atlas of the United States .......................714
American Fossil Brachiopoda: CHARLES SCHUCHERT ....................722
Astro-photographic Work to be carried out at Columbia College Observatory: HAROLD JACOBY ...........734
Current Notes on Anthropology (XIII):—
Ancient Metal Industry in the Caucasus; Alleged Western Origin of Chinese Culture; A New Theory about the Mediterranean Race; Prehistoric Trephining in Russia: D. G. BRINTON ...........736
Current Notes on Physiography (XIX):—
A Limestone Desert in the Alps; Morainic Amphitheater of Ivera; The Deforestation of Mountains: W. M. DAVIS ................727
Scientific Notes and News:—
Winter Meetings of the Scientific Societies; Field Work in Geology in the University of Kansas; The Biological Experiments Station of the University of Illinois; Snakes in Oregon; General ................728
University and Educational News ....................732
Discussion and Correspondence:—
Experimental Psychology in America: G. STANLEY HALL. The Broom Cuts Again: ELLIOTT COUS. Quaternians: VICTOR C. ALDERSON ..734
Scientific Literature:—
Scientific Journals:—
American Chemical Journal: J. ELLIOTT GILPIN ...............741
Societies and Academies:—
New York Academy of Sciences, Biological Section: BASHFORD DEAN. The Torrey Botanical Club: H. H. RUSBY. National Geographic So-
icity of Washington: W. F. M. GEOLOGICAL CON-
cference of Harvard University. Academy of Science, St. Louis: A. W. DOUGLAS ..........742

MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Prof. J. McKEEN CATTELL, Garrison on Hudson, N.Y. Subscriptions and advertisements should be sent to SCIENCE, 41 N. Queen St., Lancaster, Pa., or 41 East 49th St., New York.

MeteOLOGY IN THE UNIVERSITY.*

The atmosphere presents to us a purely material and mechanical aspect, and it is this which rivets the attention of the physicist properly so-called. He views the thundering over his head, the floods devastating the earth, the droughts destroying the crops, the hurricane lashing the ocean, and asks, is there not order and law in the midst of this confusion? It is for such a physicist, for the meteorologist proper, for him who would understand the daily weather map and would predict the weather from day to day on a rational basis, as the engineer predicts the performance of his unbuilt engine or the chemist the behavior of some novel untried combination, that I would plead. Such a student needs a collegiate course that shall fully recognize dynamic meteorology as one of the subjects in which candidates for the degree of Doctor of Philosophy may prepare for examination. Thus you will solve the problem as to what

*An extract from a report presented in 1893 to President Seth Low, of Columbia College, recommending the establishment of courses in meteorology and a meteorological laboratory in connection with the University.
