Earthquakes: Prediction Proving Elusive ................................................................. 419

Geodesy: Dealing with an Enormous Computer Task .............................................. 421

BOOK REVIEWS

"Helium Spots": Caused by a Diapiric Magma from the Upper Mantle: H. Wakita et al. .......................................................... 430

Rifampicin Inhibition of Protein Synthesis in Mammalian Cells: W. C. Buss et al. ............... 432

Channel Structures of Gramicidin: Characterization of Succinyl Derivatives: R. J. Bradley et al. ............................... 435

Potassium Activation Associated with Intraneuronal Free Calcium: R. Eckert and D. Tillotson. ............................... 437

Induction of Stalk and Spore Cell Differentiation by Cyclic AMP in Slugs of Dictyostelium discoideum: I. N. Feit et al. ............................... 439

Size Variation and the Distribution of Hemimetabolous Aquatic Insects: Two Thermal Equilibrium Hypotheses: B. W. Sweeney and R. L. Vannote ......... 444

Functional Plasticity in the Immature Striate Cortex of the Monkey Shown by the [14C]Deoxyglucose Method: M. H. Des Rosiers et al. ............................... 447

Brain Noradrenergic Systems as a Prerequisite for Developing Tolerance to Barbiturates: B. Tabakoff, J. Yanai, R. F. Ritzmann .................................................. 449

Bursting Neural Networks: A Reexamination: D. F. Russell and D. K. Hartline ............... 453

Norepinephrine in Chronic Paranoid Schizophrenia: Above-Normal Levels in Limbic Forebrain: I. J. Farley et al. ............................... 456

Technical Comments: Zooplankton Niches and the Community Structure Controversy: P. A. Lane; J. C. Makarewicz and G. E. Likens ............................... 458

Density Meter; Flame Photometer; Scintillation Vial Capper; Biological Specimen Freeze-Thaw Apparatus; Biological Safety Cabinet; Calcium Analyzer; Disposable Hand-Operated Micropipette; Literature. ............................... 464

In the tropical social wasp Metapolybia aztecoidea some subordinate egg-layers are sterilized by being forced to leave the colony or become workers. Dominance relations involved stereotyped displays: two workers "dance" at a queen (left center), while another queen (right) bends aggressively as they approach. See page 441. [Drawing by Gerardo Ravassa, Cali, Colombia]
