Density Meter; Flame Photometer; Scintillation Vial Capper; Biological Specimen Freeze-Thaw Apparatus; Biological Safety Cabinet; Calcium Analyzer; Disposable Hand-Operated Micropipette; Literature ........................................ 464

COVER

In the tropical social wasp Metapolybia azteoides some subordinate egg-layer workers are sterilized by being forced to leave the colony or become workers. Dominance relations involved stereotyped displays: two workers "dance" at a queen (left center), while another queen (right) bends aggressively as they approach. See page 441.
