

**The First Wide Range
Microtome-cryostat...
Temperatures from
-15°C to -50°C...
Frozen Sections
from 40 μ to 2 μ.**

The Harris LoTemp model WRC is two microtome-cryostats in one. A single unit that can do both routine diagnostic procedures and such sophisticated research procedures as thin section light microscopy, autoradiography, fluorescence microscopy and other histological procedures, at a cost comparable to presently available routine cryostats.

The Harris model WRC is compact . . . can be moved anywhere it's needed. The cold chamber has extra room for tissue handling, storage or freeze drying. Full opening top with special access ports combines the features of a totally closed system with the easy accessibility of open top models.

Available equipped with International Equipment Corp. microtomes, or cryostat only prepared for installation of your present I.E.C. microtome. Installed stereo zoom microscope also available.

For a full description of the Harris WRC and its wide range of additional features write or call . . .

The Meeting's Not Over Yet!

It can go for as long—and whenever—you like.

CEBAR has high-quality tapes of some of the sessions from the 1976, 1977, and 1978 AAAS Annual Meetings.

There are tapes on atmospheric sciences, medical sciences, social and behavioral sciences, physical and mathematical sciences, environmental sciences, energy, resources policy—and just about any subject in which you're interested. Your staff or class can share in the information of AAAS meetings because these tapes include both the lectures as well as question-and-answer sessions.

Write to CEBAR and ask for a complete list of AAAS tape titles and prices:
