LETTERS
Scientific Exchange with the Soviets: B. Dole; Nitrates and Nitrites in the Human Diet: P. E. Hartman; Saccharin, Cancer, and Calories: T. C. Campbell; B. L. Cohen; Vietnamese Universities: J. Mayer; Shroud Study: J. S. Accetta ................................................................. 260

EDITORIAL
Disease Prevention: Asking the Right Questions: E. L. Wynder ................................................................. 265

ARTICLES
The Pecked Cross Symbol in Ancient Mesoamerica: A. F. Aveni, H. Hartung, B. Buckingham ................................................................. 267
Nucleosome Arcs and Helices: J. Dubochet and M. Noll ................................................................. 280
Future Sources of Organic Raw Materials: I. S. Shapiro ................................................................. 287

NEWS AND COMMENT
Technology Creep and the Arms Race: Two Future Arms Control Problems ................................................................. 289
OSTP Faults Energy Research Quality: Fossil and Solar Found Wanting ................................................................. 293
Send Not to Know for Whom the Nobel Tolls: It's Not for Thee ................................................................. 295

RESEARCH NEWS
The Fields Medals (I): Relating the Continuous and the Discrete: G. D. Mostow ................................................................. 297
Antibodies (I): New Information About Gene Structure ................................................................. 298

BOOK REVIEWS
The Sociology of Science in Europe, reviewed by S. Shapin; An Introduction to Population Ecology, T. R. E. Southwood; Monte Albán, W. T. Sanders and R. S. Sanlevy; Island Arcs, Deep Sea Trenches and Back-Arc Basins, A. G. Smith; Books Received and Book Order Service ................................................................. 300

REPORTS
North American Pleistocene Stages Reconsidered in Light of Probable Pliocene-Pleistocene Continental Glaciation: J. Boellstorff ................................................................. 305
Condensation of Nonequilibrium Phases of Refractory Silicates from the Vapor: K. L. Day and B. Donn

Intraspecific Evidence for the Function of Single and Double Cones in the Teleost Retina: G. W. Boehlert

Prolactin Synthesis by Human Chorion-Decidual Tissue: A Possible Source of Prolactin in the Amniotic Fluid: A. Golander et al.

Tumor-Promoting Phorbol Esters Inhibit Binding of Epidermal Growth Factor to Cellular Receptors: L.-S. Lee and I. B. Weinstein

The Attention Operating Characteristic: Examples from Visual Search: G. Sperling and M. J. Melchner

Alkaline Phosphatase in Epstein-Barr Viral Nuclear Antigen-Positive Cell Lines: A. Karpass et al.

Regulation of Macrophage Tumoricidal Function: A Role for Prostaglandins of the E Series: R. M. Schultz et al

Presynaptic Alpha-Receptor Subsensitivity After Long-Term Antidepressant Treatment: F. T. Crews and C. B. Smith

Neural Lateralization of Species-Specific Vocalizations by Japanese Macaques (Macaca fuscata): M. R. Petersen et al

Effects of the Home Environment on Withholding Behaviors and Conditioning in Infant and Neonatal Rats: G. J. Smith and N. E. Spear

Infant Astigmatism Measured by Photorefraction: H. C. Howland et al.

Productivity of Ospreys in Connecticut-Long Island Increases as DDE Residues Decline: P. R. Spitzer et al.

Freeze Dryer; Spectrofluorometer; Color Measuring System; Peristaltic Pump; Color Television for Microscopy; Composition Analyzer; Constant Temperature Apparatus; Literature

MEETING

Gordon Research Conferences: Winter 1979: A. M. Cruickshank

PRODUCTS AND MATERIALS

Freeze Dryer; Spectrofluorometer; Color Measuring System; Peristaltic Pump; Color Television for Microscopy; Composition Analyzer; Constant Temperature Apparatus; Literature

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
