BOOK REVIEWS

Science in Culture, reviewed by A. Thackray; Chemists by Profession, J. W. Servos; Structure and Properties of Nearby Galaxies and the Large Scale Structure of the Universe, V. Rubin; The Origin of the Solar System, S. J. Weidenschilling; Avian Breeding Cycles, R. E. Ricklefs
Viking Bistatic Radar Observations of the Hellas Basin on Mars:
Preliminary Results: R. A. Simpson et al. ........................................ 45

Coral Reef Growth in the Galapagos: Limitation by Sea Urchins:
P. W. Glyn, G. M. Wellington, C. Birkeland .................................. 47

Pyrite: Its Rapid Formation in a Salt Marsh and Its Importance in
Ecosystem Metabolism: R. W. Howarth .......................................... 49

Diphytanyl and Diphytanyl Glycerol Ether Lipids of Methanogenic
Archaeobacteria: T. G. Tornabene and T. A. Langworthy ............. 51

Ethanol Ingestion: Differences in Blood Acetaldehyde Concentrations in
Relatives of Alcoholics and Controls: M. A. Schuckit and V. Ruyse ................................. 54

N-Acetyl Gramicidin: Single-Channel Properties and Implications for
Channel Structure: G. Scabo and D. W. Urry ................................ 55

Irradiance Modulation Used to Examine Sound-Radiating Cuticular Motion in
Insects: W. M. Masters ...................................................................... 57

Synaptic Phosphoproteins: Specific Changes After Repetitive Stimulation
of the Hippocampal Slice: M. Browning et al. ................................. 60

Catechol-O-Methyltransferase: Thermolabile Enzyme in Erythrocytes of
Subjects Homozygous for Allele for Low Activity: P. D. Scanlon,
F. A. Raymond, R. M. Weinsilboun ........................................... 63

Octopamine Receptors, Adenosine 3’5’-Monophosphate, and Neural Control
of Firefly Flashing: J. A. Nathanson ............................................. 65

Cholecystokinin in the Brains of Obese and Nonobese Mice: E. Straus and
R. S. Yalow ...................................................................................... 68

Target Range-Sensitive Neurons in the Auditory Cortex of the Mustache Bat:
W. E. O’Neill and N. Suga .................................................................. 69

Reducing Epileptic Seizures Through Operant Conditioning of Central
Nervous System Activity: Procedural Variables: A. Cott, R. P. Pavloski,
A. H. Black ..................................................................................... 73

Plasticity: The Mirror of Experience: D. N. Spinelli and F. E. Jensen .... 75

Membrane Glycolipids: Regional Synthesis and Axonal Transport in a Single
Identified Neuron of Aplysia californica: A. A. Sherbany, R. T. Ambron,
J. H. Schwartz ................................................................................. 78

Technical Comments: Factors in Summer Ozone Production in the San Francisco
Air Basin: J. J. Bufalini; P. R. Miller, J. N. Pits, Jr., A. M. Winer;
J. S. Sandberg, M. J. Basso, B. A. Okin ......................................... 81

Slate-pencil sea urchin, Eucidaris thoaruris (Val.), perched on the reef-
building coral Pocillopora zunicornis (L.). In Panama, the urchin grazes on
the coral only if deprived (for several weeks) of coralline algae and other
preferred prey. See page 47. [G. M. Wellington, University of California, Santa
Barbara]
