BOOK REVIEWS

Cancer in China, reviewed by G. N. Stemmerman; Explorations in Ethnoarchaeology, B. Hayden; Cognitive Processes in Comprehension, J. M. Mandler; Estuarine Transport Processes, R. T. Cheng; Books Received ................................................................. 257

REPORTS

Neutron Scattering of Solution-Grown Polymer Crystals: Molecular Dimensions Are Insensitive to Molecular Weight: D. M. Sadier and A. Keller ................................................................. 263

In vitro Model for Stretch-Induced Hypertrophy of Skeletal Muscle: H. Vandenburgh and S. Kaufman ................................................................. 265

Phycomyces: Modification of Spiral Growth after Mechanical Conditioning of the Cell Wall: R. I. Gamow and B. Bottger ................................................................. 268

Harmonic-Sensitive Neurons in the Auditory Cortex of the Mustache Bat: N. Suga, W. E. O’ Nell, T. Manabe ................................................................. 270

Evidence Against a Role of Acetaldehyde in Electroencephalographic Signs of Ethanol-Induced Intoxication: J. A. Mikeska and W. R. Klemm ................................................................. 276

Stimulation of Human Periaqueductal Gray for Pain Relief Increases Immunoreactive β-Endorphin in Ventricular Fluid: Y. Hosobuchi et al. ................................................................. 279

Intracerebral Adrenocorticotropic Hormone Mediates Novelty-Induced Grooming in the Rat: A. J. Dunn, E. J. Green, R. L. Isaacson ................................................................. 281

Accumulation of a Tetrahydroisoquinoline in Phenylketonuria: J. M. Lasala and C. J. Coscia ................................................................. 283

PRODUCTS AND MATERIALS

Programmable Sequencer; Gas Chromatograph; Microscope Photometer; pH Meter; Sendai Vaccine; Carboxylic Acid Analyzer; Microanalytic Balance; Literature ................................................................. 285

COVER

Artist’s concept of distribution problems brought about by decreasing availability of petroleum. Petroleum resources are finite, and this will eventually place restrictions on end uses. See page 233. [Stephen Shepherd, Silver Spring, Maryland]
