COVER

Little Salt Spring, Florida. Cross section of the pond and the underwater cavern. Abundant human remains, vertebrate and invertebrate fossils (food refuse), and wood, bone, and shell artifacts have been found in sediments on re-entrants in the cavern and on the floor of the pond and adjacent slough. The site includes an Archaic cemetery 5000 to 6000 years old, with an estimated 1000 burials. See page 609. [Steve Daniels, Department of Administration, State of North Carolina, Raleigh]
