Chart; Biological Oxygen Monitor; Flask Heaters; Microprocessor-
Based Liquid Scintillation Counter; Radioimmunoassay Data
Reduction; Literature ........................................ 436

COVER

Atlantic seascape. The Virginia barrier islands are the most rapidly changing section of the Atlantic Coast. These islands are undergoing rapid and systematic changes in shoreline configuration that may lead to the development of two capelike features in the next 100 years. See page 401. [B. J. Nixon, Missouri City, Texas]
