The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

COVER

A musk fragrance that the cosmetics industry has voluntarily withdrawn from all cosmetic preparations on the market causes a blue discoloration of the nervous system of rats when it is applied repeatedly to the skin. See page 633. [Stephen Shepherd, Silver Spring, Maryland]
