SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C., Second-class postage (publication No. 484460) paid at Washington, D.C., and at an additional entry. New combined with The Scientific Monthly®, Copyright © 1979 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $34. Domestic institutional subscription (51 issues): $70. Foreign postage extra; Canada $12, other (surface mail) $12, other (air mail) $40. First class, airmail, school-year, and student rates on request. Single copies $1.50 ($2 by mail); back issues $2.50 ($3 by mail); classroom rates on request. Change of address: allow 8 weeks, giving old and new addresses and seven-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is in the Reader's Guide to Periodical Literature and in several specialized indexes.
Application of Carbon Isotope Stratigraphy to Late Miocene Shallow Marine Sediments, New Zealand: T. S. Loutit and J. P. Kennett

Nautilus Movement and Distribution in Palau, Western Caroline Islands: W. B. Saunders and C. Spinosa

Allan Hills 77005: A New Meteorite Type Found in Antarctica: H. Y. McSween, Jr., L. A. Taylor, E. M. Stolper

Phospholipid Methylation Unmasks Cryptic β-Adrenergic Receptors in Rat Reticulocytes: W. J. Strittmatter, F. Hirata, J. Axelrod

Partially Modified Retro-Inverso-Enkephalinamides: Topochemical Long-Acting Analogs in vitro and in vivo: M. Chorev et al.

Diffusion-Like Processes Can Account for Protein Secretion by the Pancreas: L. D. Isenman and S. S. Rothman

Tissue Perfusion Rate Determined from the Decay of Oxygen-15 Activity After Photon Activation in situ: W. L. Hughes et al.

Effect of Fluorine Substitution on the Agonist Specificity of Norepinephrine: D. Cantacuzene et al.

Embryonic Development of Identified Neurons: Temporal Pattern of Morphological and Biochemical Differentiation: C. S. Goodman et al.

C14 Sterol in a Human Urine: N. Ikekawa et al.

Non-Inactivation of an X-Chromosome Locus in Man: L. J. Shapiro et al.

Separation of D and L Amino Acids by Liquid Chromatography: Use of Chiral Eluants: P. E. Hare and E. Gil-Av

Dendritic Mechanisms Underlying Penicillin-Induced Epileptiform Activity: R. K. S. Wong and D. A. Frince

Behavior Maintained by Termination of a Schedule of Self-Administered Cocaine: R. D. Spealdman

Norepinephrine Inhibits Calcium-Dependent Potentials in Rat Sympathetic Neurons: J. P. Horn and D. A. Mcafee

Technical Comments: Brain Stimulation Reinforcement: Implications of an Electrode Artifact: M. B. Cantor; R. J. Beninger, F. Bellisle, P. M. Milner; Computed Tomography Scans of Alcoholics: Cerebral Atrophy?: S. Y. Hill and M. Mikhail; P. L. Carlen et al.

COVER

American forest. Annual net growth of wood in American forests has increased dramatically in the past 60 years, largely as a result of earlier cutting of virgin forests. The capacity of these forests to grow timber has been consistently underestimated in official reports. See page 1168. [Photograph provided courtesy of American Forest Institute, Washington, D.C.]
