© is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. Second-class postage (publication No. 484460) paid at Washington, D.C. and at an additional entry. Now combined with The Scientific Monthly®. Copyright © 1979 by the American Association for the Advancement of Science. Domestic membership and subscription (51 issues): $34. Domestic institutional subscription (51 issues): $70. Foreign postage extra; Canada $12, other (surface mail) $12, other (airmail) $25. First class, airmail, school-year, and student rates on request. Single copies $1.50 (2$ by mail); back issues $2.50 (3$ by mail); classroom rates on request. Change of address: allow 8 weeks, giving old and new addresses and seven-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is listed in the Reader's Guide to Periodical Literature and in several specialized indexes.
Application of Carbon Isotope Stratigraphy to Late Miocene Shallow Marine Sediments, New Zealand: T. S. Loutit and J. P. Kennett .......................... 1196

Nautilus Movement and Distribution in Palau, Western Caroline Islands: W. B. Saunders and C. Spinosa ................................................................. 1199

Allan Hills 77005: A New Meteorite Type Found in Antarctica: H. Y. McSween, Jr., L. A. Taylor, E. M. Stolper ..................................................... 1201

Phospholipid Methylation Unmasks Cryptic β-Adrenergic Receptors in Rat Reticulocytes: W. J. Strittmatter, F. Hirata, J. Axelrod .............................. 1205

Partially Modified Retro-Invresco-Enkephalinamides: Topochemical Long-Acting Analogs in vitro and in vivo: M. Chorev et al. ................................. 1210

Diffusion-Like Processes Can Account for Protein Secretion by the Pancreas: L. D. Isenman and S. S. Rothman .............................................................. 1212

Tissue Perfusion Rate Determined from the Decay of Oxygen-15 Activity After Photon Activation in situ: W. L. Hughes et al. ........................................... 1215

Effect of Fluorine Substitution on the Agonist Specificity of Norepinephrine: D. Cantacuzene et al. ................................................................. 1217

Embryonic Development of Identified Neurons: Temporal Pattern of Morphological and Biochemical Differentiation: C. S. Goodman et al. ................. 1219

C26 Sterol in a Human Urine: N. Ikekawa et al. ........................................... 1223

Non-Inactivation of an X-Chromosome Locus in Man: L. J. Shapiro et al. ................................................................................................................... 1224

Separation of δ and γ Amino Acids by Liquid Chromatography: Use of Chiral Eluants: P. E. Hare and E. Gil-Av ...................................................... 1226

Dendritic Mechanisms Underlying Penicillin-Induced Epileptiform Activity: R. K. S. Wong and D. A. Prince ................................................................. 1228

Behavior Maintained by Termination of a Schedule of Self-Administered Cocaine: R. D. Spealman ................................................................................. 1231

Norepinephrine Inhibits Calcium-Dependent Potentials in Rat Sympathetic Neurons: J. P. Horn and D. A. McAfee ...................................................... 1233

Technical Comments: Brain Stimulation Reinforcement: Implications of an Electrode Artifact: M. B. Cantor; R. J. Beninger, F. Bellisle, P. M. Milner; Computed Tomography Scans of Alcohols: Cerebral Atrophy?: S. Y. Hill and M. Mikhail; P. L. Carlen et al. ....................................................... 1235

American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are further work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, prove the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
Science 204 (4398), 1154-1238.
