SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 484480) paid at Washington, D.C., and at an additional entry. Now combined with The Scientific Monthly; Copyright © 1979 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $34. Domestic institutional subscription (51 issues): $70. Foreign postage extra: Canada $12, other (surface mail) $40. First class, airmail, school-year, and student rates on request. Single copies $1.50 ($2 by mail); back issues $2.50 ($3 by mail); classroom rates on request. Change of address: allow 6 weeks, giving old and new address and seven-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is listed in the Reader’s Guide to Periodical Literature and in several specialized indexes.
Earthquake-Caused Landslides: A Major Disturbance to Tropical Forests: 
N. C. Garwood, D. P. Janos, N. Brokaw ........................................... 997

Observation of a Subsurface Oil-Rich Layer in the Open Ocean: 
G. R. Harvey et al. ........................................................................... 999

Oxidant Effects on Californian Coastal Sage Scrub: W. E. Westman ........ 1001

Insulin Receptor Binding in Obesity: A Reassessment: R. I. Misbin, J. P. O’Leary, A. Pulkkinen .................. 1003

Chronic Zinc Deficiency Alters Neuronal Function of Hippocampal Mossy Fibers: 
G. W. Hesse .............................................................................. 1005

Genetic Effects of Impure and Pure Saccharin in Yeast: C. W. Moore and A. Schmick ................................. 1007

High Concentrations of Glutathione in Glandular Stomach: Possible Implications for Carcinogenesis: S. C. Boyd, H. A. Sasame, M. R. Boyd .................................................. 1010

Novel Activation Mechanism for the Promutagenic Herbicide DiLLate: 
I. Schuphan, J. D. Rosen, J. E. Casida ........................................... 1013

Visual Resolution and Receptive Field Size: Examination of Two Kinds of Cat Retinal Ganglion Cell: B. G. Cleland, T. H. Harding, U. Tulunay-Keerey ........... 1015

The Central Origin of Efferent Pathways in the Carotid Sinus Nerve of the Cat: 
W. C. deGroot et al. ................................................................ 1017

Saccharin Metabolism and Tumorigenicity: T. W. Sweatman and A. G. Renwick ....................................... 1019

Tidal Vertical Migration: An Endogenous Rhythm in Estuarine Crab Larvae: 
T. W. Cronin and R. B. Forward, Jr. ................................................. 1020

Subfornical Organ Efferents to Neural Systems for Control of Body Water: 
R. R. Misulis, R. E. Shapiro, P. J. Hand ............................................. 1022

3-Methoxy-4-Hydroxyphenylenglycol Production by Human Brain in vivo: 
J. W. Maas et al. ....................................................................... 1025

Pigeons Have Magnets: C. Walcott, J. L. Gould, J. L. Kirschvink ................ 1027

Dr. Guthrie and Felis domestica Or: Tripping Over the Cat: B. R. Moore and S. Stuttard ............................ 1031

Specific Nonopiate Receptors for β-Endorphin: E. Hazum, K.-J. Chang, P. Cuatrencasas ........................................... 1033

Technical Comments: Chromosome 13 Long Arm Interstitial Deletion May Result from Maternal Inverted Insertion: S. F. Hoegerman; Protein and Nucleic Acid Sequence Data and Phylogeny: V. Demoulin; R. M. Schwartz and M. O. Dayhoff; Long-Term Choline Treatment of Memory-Impaired Elderly Patients: S. H. Ferris et al.; K. L. Davis; Cardiopulmonary Changes in Kittens During Sleep: W. G. Guntheroth; D. J. McGinty and T. Baker .......................... 1035

Cover

An unusual "tongue" of land and other coastal landslides along the southeastern coast of Panama (approximately marked 7°N, 77°W) created by earthquakes 6.7 and 7.0 on the Richter scale in September 1976, approximately 54 square kilometers of mature tropical forest was denuded at this time. For scale, trees average 30 to 35 meters in height. See page 997. [Nancy C. Garwood, Loyola University of Chicago, Chicago, Illinois]
