American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, prove the effectiveness of science in the promotion of human welfare, and to increase public understanding and reciation of the importance and promise of the methods of science in human progress.			

**COVER**

Male bank swallow singing to potential mate at the mouth of his burrow (note throat pouch bellowing and open mouth). Song is one of the nest advertisement displays. See page 1282. [M. D. Beecher, University of Washington, Seattle]
