Electrophoresis System; Immunoreagents; Automated HPLC; Literature ........ 720

COVER

Reconstruction of the largest species in the fossil family Plotopteridae, shown  
to scale with the outline of the largest living penguin. These giant seabirds  
habited the North Pacific about 30 million years ago. They were flightless and  
had paddle-like wings similar to penguins, but belong to the unrelated order  
Pelecaniformes. See page 688. [B. Dalgell, Rockville, Maryland]
