PRODUCTS AND MATERIALS

pH Meter; Glycohemoglobin Kit; Atomic Absorption Spectrometer; Scientific Computer; X-ray Diffractometer; Platelet Aggregation Meter; Calibration Weights for Electronic Balances; Microprobe for Cell Disruptor; Literature

MEETING

Gordon Research Conferences: A. M. Cruikshank

REPORTS

Swimming Ability of Carnivorous Dinosaurs: W. P. Coombs, Jr. ................................................. 1198
Oxygen Ion-Conducting Ceramics: A New Application in High-Temperature-High-Pressure pH Sensors: L. W. Niedrach ................................................................. 1200
Phenolic Ethers in the Organic Polymer of the Murchison Meteorite: R. Hayaisu et al. .......................... 1202
Dissolution of Pyroxenes and Amphiboles During Weathering: R. A. Berner et al. .............................. 1205
Laminated Diatomaceous Sediments from the Guaymas Basin Slope (Central Gulf of California): 250,000-Year Climate Record: H. Schrader et al. ........................................ 1207
Fluorescent Light Induces Malignant Transformation in Mouse Embryo Cell Cultures: A. R. Kennedy, M. A. Ritter, J. B. Little ................................................................. 1209
The Oaxaca, Mexico, Earthquake of 29 November 1978: A Preliminary Report on Aftershocks: S. K. Singh et al. ........................................................................................................ 1211
Artificial Sweetener Use and Bladder Cancer: A Case-Control Study: E. L. Wynder and S. D. Stellman ................................................................. 1214
Detrital Nonprotein Amino Acids Are the Key to Rapid Growth of Tilapia in Lake Valencia, Venezuela: S. H. Bowen .......................................................................................... 1216
Babesia bovis: Continuous Cultivation in a Microaerophilous Stationary Phase Culture: M. G. Levy and M. Ristic ........................................................................................................ 1218
Mebendazole Therapy of Parenteral Trichinellosis: R. O. McCracken and D. D. Taylor ........................................ 1220
Properties of a Normal Mouse Cell DNA Sequence (sarc) Homologous to the src Sequence of Moloney Sarcoma Virus: M. Oskarsson et al. ........................................................ 1222
Vomeronasal Pump: Significance for Male Hamster Sexual Behavior: M. Meredith et al. ......................................................... 1224
Differences in the Distribution of Gray and White Matter in Human Cerebral Hemispheres: R. C. Gur et al. ........................................................................................................ 1226

COVER

Scanning electron photomicrograph of a dissolution "micro-cave" in the mineral augite. The "stalactites" (which are 2 to 5 micrometers long) are actually undissolved augite remaining between coalesced, lens-shaped etch pits. Similar etch features are characteristic of pyroxene dissolution in nature and in the laboratory. See page 1205. [Alan S. Pooley, Peabody Museum, Yale University, New Haven, Connecticut]
