

AAAS SCIENCE COMPENDIA SERIES

Series Editor: Philip H. Abelson

From the pages of SCIENCE comes a series of compendia designed to cover the principal issues that face science and society—now and for tomorrow. Each book presents the reader with an in-depth review of a given issue through authoritative articles written by the leading experts in the field. These compendia can serve not only as valuable reference sources for scientists and researchers, but also as supplementary reading material in courses devoted to these issues that concern all of us.

ENERGY: Use, Conservation, and Supply

Gives a historical and general overview of our energy problem and examines ways to conserve energy and use it more efficiently, not only in industry but on an individual level. Examines the problems we face in the energy requirements for food production and reviews known energy sources in relation to current and future energy needs.
