COVER

The Dardanelles and Sea of Marmara as seen by a German cartographer in 1694. Scholars at that time believed the city of Troy to be either mythical or located at an unidentified site to the south (right). Greek and Roman historians such as Strabo offered specific information as to the strategic location of Troy near the Dardanelles (Hellespont), but were generally ignored until the time of Schliemann (1870's). See page 776. [From an original print in the collection of John C. Kraft, University of Delaware, Newark]
