CONTENTS:

Academic Ideals: Professor R. S. Woodward 41

The American Association for the Advancement of Science:—

The Present State of Geodesy: O. H. Tittmann 46

Future Developments in Physical Chemistry: Professor Wilder D. Bancroft 50

Reports of Committees 59

Scientific Books:—

Granville on the Differential and Integral Calculus: Professor James Pierpont.

Venable on the Study of the Atom: E. T. Allen 64

Societies and Academies:—

Discussion and Correspondence:—

Interesting and Important Facts: G. K. Gilbert. Specialization, Ignorance and Some Supposed Palliatives: Dr. Francis B. Sumner. Ultra-Violet Light in Photomicroscopy: Dr. Clifford Richardson. How does Anopheles Bite? Professor John B. Smith 68

Special Articles:—

Discussion in the British Parliament on the Metric Bill: James Seaman 72

Current Notes on Meteorology:—

Temperatures in the Free Air; Bad Weather, Good Roads and Farmers; Monthly Weather Review; No Secular Change of Climate in Tripoli; Climatic Changes in the Lake Chad Region; Kite Meteorology over Lake Constance: Professor R. DeC. Ward 75

First Observations with ‘Balloons-Sondes’ in America 76

Scientific Notes and News 77

University and Educational News 80

MSS. Intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

ACADEMIC IDEALS.*

The beginning of an academic year calls up at once the lighter thoughts of pleasing associations and the graver thoughts of inspiring obligations. Here on the table-land of intellectual life youth and age meet to labor for a season in the fields of knowledge and discovery. The confident optimism of youth seeks to be chastened by the gentle admonition of experience. Youth imparts its buoyancy to age, age imparts its wisdom to youth, and both are kindled by the glow of elevating aspirations. It is a time, therefore, for a blending of our lighter and our graver reflections.

Being delegated for the moment to speak to and for this academic body, it has seemed that some considerations on academic ideals might serve to awaken thought and to arouse zeal appropriate to the occasion. In the abstract, however, this would appear to be a delicate and a difficult subject; delicate because of diversity of sentiment, and difficult because of diversity of judgment, amongst those best qualified to speak, as to what academic ideals are, or as to what they should be. Hence it may seem fitting at the outset to suggest application to the views here set forth of the Socratic caution that they can hardly be exactly as represented, if not the more sweeping caution of Marcus Aurelius—'Remember that all is opinion.' But the delicacy and the difficulty of the subject...
