Male Photuris Fireflies Mimic Sexual Signals of Their Females’ Prey: J. E. Lloyd.

Nonolfactory Sensory Pathway to the Telencephalon in a Teleost Fish: T. E. Finger.

Cover

Firefly habitat in northwestern peninsular Florida in March. Pulsing Photuris males descend from tall pines to fly, flicker, and glow, like males of unrelated species. Males are probably in quest of their females which are, in turn, hunting the foreign males by aggressive signal mimicry. See page 669.
