BOOK REVIEWS
The First Americans, reviewed by D. D. Anderson; Earthquake Engineering and Hazards Reduction in China, F. T. Wu; Symposium on Glacier Beds, W. S. B. Paterson; Liposomes in Biological Systems, D. Papahadjopoulos; Books Received
Reports

Rupture Zones of Great Earthquakes in the Alaska-Aleutian Arc, 1784 to 1980: L. R. Sykes et al. ................................................................. 1343

A Temperature and Precipitation Record of the Past 16,000 Years in Southern Chile: C. J. Heusser and S. S. Streeter ........................................ 1345

Possible Fluid Dynamical Interpretation of Some Reported Features in the Jovian Atmosphere: T. Maxworthy and L. G. Redekopp .................. 1350

Lightning on Jupiter: Rate, Energetics, and Effects: J. S. Lewis .................. 1351

Fluoride Distribution and Biological Availability in the Fallout from Mount St. Helens, 18 to 21 May 1980: D. R. Taves ................................. 1352

Deforestation and Increased Flooding of the Upper Amazon: A. H. Gentry and J. Lopez-Paredi ............................................................. 1354

Chemical Species in Fly Ash from Coal-Burning Power Plants: L. D. Hulett, Jr., et al. .............................................................. 1356

Resonance Raman Effect of Carbonyl Group as a Probe of Its n-Electron State: Y. Nishimura and M. Tsuibo .............................. 1358

Comparison of the Nucleic Acid Sequence of Anglerfish and Mammalian Insulin mRNA's from Cloned cDNA's: P. M. Hobart et al. .......... 1360

Modulation of Epidermal Growth Factor Receptors on 3T3 Cells by Platelet-Derived Growth Factor: M. Wran, C. F. Fox, R. Ross .......... 1363

Ratoon Stunting Disease of Sugarcane: Isolation of the Causal Bacterium: M. J. Davis et al. ................................................................. 1365

Functional Development of Grafted Vasopressin Neurons: D. Gash, J. R. Sladek, Jr., C. D. Sladek .......................................................... 1367

Mental Symptoms in Huntington's Disease and a Possible Primary Aminergic Neuron Lesion: J. J. Mann et al. ........................................ 1369

Pineal Melatonin Rhythm: Reduction in Aging Syrian Hamsters: R. J. Reiter et al. ................................................................. 1372

Neural Organization Predicts Stimulus Specificity for a Retained Associative Behavioral Change: J. Farley and D. L. Alkon .............. 1373

Membrane Depolarization Accumulates During Acquisition of an Associative Behavioral Change: D. L. Alkon ........................................ 1375

Technical Comments: Arginine Vasopressin in Extracts of Bovine Pituitary: J. H. Cort; H. J. Gitelman et al. ........................................... 1377

Cover

Scanning electron photomicrographs of fly ash particles that have been etched in 1 percent hydrogen fluoride (×2200). Glass phases and the toxic elements contained within them have been removed, leaving crystalline residues of mullite (needles) and quartz. These are relatively pure and may be a recoverable resource that can be used in commercial ceramic manufacture. See page 1356. [Photomicrographs, Oak Ridge National Laboratory Analytical Chemistry Division, Oak Ridge, Tennessee 37830]
