SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 464469) paid at Washington, D.C. and at additional entry. Now combined with The Scientific Monthly. Copyright © 1980 by the American Association for Advancement of Science. Domestic individual membership and subscription (51 issues): $38. Domestic institutional subscription (51 issues): $78. Foreign postage extra: Canada $14 other (surface mail) $7, air-service via Amsterdam $45. First class, airmail, school-year, and student rates on request. Single copies $1.50 ($2 by mail); back issues $2.50 ($3 by mail); classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is read in the Reader's Guide to Periodical Literature and in several specialized indexes.

COVER

Profile view of volcanic ash from Mount St. Helens deposited on soil surface around stems of wheat plants near Lind, Washington. Most of the ash was shed from the wheat foliage and settled around the bases of the stems. A record wheat crop was harvested in Washington because of the above-normal rainfall in June and possibly because of the ash “mulch” on the soil surface. See page 16. [R. J. Cook, Regional Cereal Disease Laboratory, U.S. Department of Agriculture, Pullman, Washington 99164]
