REPORTS

Turbulent Vertical Transport due to Thin Intermittent Mixing Layers in the Stratosphere and Other Stable Fluids: E. M. Dewan .................................................. 1041

Ruminant Methane $\delta^{13}C/\delta^{12}C$ Values: Relation to Atmospheric Methane: F. Rust .............................................................. 1044

Receptor for Albumin on the Liver Cell Surface May Mediate Uptake of Fatty Acids and Other Albumin-Bound Substances: R. Weisiger, J. Gollan, R. Ockner .................................................. 1048

Anabaseine: Venom Alkaloid of Aphaenogaster Ants: J. W. Wheeler et al. .................. 1051

Living Tissue Formed in vitro and Accepted as Skin-Equivalent Tissue of Full Thickness: E. Bell et al. .................................................. 1052

Separation of Calcium Isotopes by Liquid Phase Thermal Diffusion: W. M. Rutherford and K. W. Laughlin .................................................. 1054

Phase Shifting Circadian Rhythms Produce Retrograde Amnesia: W. N. Tapp and F. A. Holloway .................................................. 1056

Sex-Biased Litter Reduction in Food-Restricted Wood Rats (Neotoma floridana): P. A. McClure .................................................. 1058

Ascending Endorphin Inhibition of Distress Vocalization: B. H. Herman and J. Panksepp .................................................. 1060

Saliva as a Chemical Cue in the Development of Social Behavior: M. L. Block, L. C. Volpe, M. J. Hayes .................................................. 1062

Auditory Brainstem Potentials in Chronic Alcoholics: H. Begleiter, B. Porjesz, C. L. Chou .................................................. 1064

Rapid Correction of Hyponatremia Causes Demyelination: Relation to Central Pontine Myelinolysis: B. K. Kleinschmidt-DeMasters and M. D. Norenberg .................................................. 1068

Vaginocervical Stimulation Selectively Increases Metabolic Activity in the Rat Brain: T. O. Allen et al. .................................................. 1070

Paradoxical Elevation of Growth Hormone by Intraventricular Somatostatin: Possible Ultrashort-Loop Feedback: M. D. Lumpkin, A. Negro-Vilar, S. M. McCann .................................................. 1072

COVER

Computer image illustrates new concept for vertical transport by thin random turbulent layers in stable fluids. The volcano (background) symbolizes the injection of foreign matter in the stratosphere which will subsequently be vertically transported, in part, by this mechanism. See page 1041. [Artwork: Gene Pepin (Graphics Department, Air Force Geophysics Laboratory, Hanscom Air Force Base, Massachusetts) and Brian Dewan (Lexington High School, Lexington, Massachusetts); photography: Patrick J. Windward (Photo Laboratory, Air Force Geophysics Laboratory)]
