SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 484460) paid at Washington, D.C., and at an additional entry. Now combined with The Science Monthly. Copyright © 1981 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $43. Domestic institutional subscription (51 issues): $80. Foreign postage extra: Canada $24, other (surface mail) $37, air surface via Amsterdam $55. First class, airmail, school-year, and student rates on request. Single copies $2 ($2.50 by mail); back issues $3 ($3.50 by mail). Classroom rates on request. Change of address: allow 8 weeks, giving old and new addresses and seven-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
REPORTS

Microparticle Concentration Variations Linkcd with Climatic Change: Evidence from Polar Ice Cores: L. G. Thompson and E. Mosley-Thompson . 812

The Prolactin Gene Is Located on Chromosome 6 in Humans: D. Owerbach et al. 815

Feminizing Effect of Mesonephros on Curnlted Differentiating Mouse Gonads and Ducts: A. G. Byskov and J. Grinsted ........................... 817

Hormonal Requirements for Growth of Arterial Smooth Muscle Cells in vitro: An Endocrine Approach to Atherosclerosis: R. Weinstein, M. B. Stemerman, T. Maclag ........................................ 818

Normalization by Cell Fusion of Sister Chromatid Exchange in Bloom Syndrome Lymphocytes: Y. Shiraisi, S. Matsui, A. A. Sandberg .................. 820

Increased Reproductive Effort with Age in the California Gull (Larus californicus): B. H. Pugesek .................................................. 822

Growth and Reshaping of Axons in the Establishment of Visual Callosal Connections: G. M. Innocenti ........................................... 824

Two Distinct Central Serotonin Receptors with Different Physiological Functions: S. J. Perouka, R. M. Lebovitz, S. H. Snyder ..................... 827

Rod-Cone Interaction in the Distal Human Retina: M. A. Sandberg, E. L. Berson, M. H. Effron ......................................................... 829

Color and Luminance: Independent Frequency Shifts: O. E. Favreau and P. Cavanagh ................................................................. 831

The oceanographer François Péron. Péron joined the 1800–1804 French expedition to Australian waters, led by Nicolás Baudin, as a zoologist. On this expedition more than 100,000 specimens of animals were collected. Péron also made systematic measurements of the temperature of the sea. [From Péron's account of the expedition, Voyage de Découvertes aux Terres Australes; reproduced in I. S. F. Jones and J. E. Jones, "Early 19th century oceanography around Terra Australis," in Oceanography: The Past, reviewed on page 792]
Science 212 (4496), 737-838.
