SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 464640) paid at Washington, D.C., and at an additional entry. Now combined with The Science Monthly: Copyright © 1981 by the American Association for the Advancement of Science. Domestic individual membership and subscription ($1 issues; $43 Domestic institutional subscription ($1 issues: $69 Foreign postage extra: Canada $24, other (surface mail) $27, air-surface via Amsterdam $55. First class, airmail, school-year, and student rates on request. Single copies $2 ($2.50 by mail); back issues $3 ($3.50 by mail); classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
Deep-Seated Gas Emission Induced by the Earth Tide: A Basic Observation for Geochemical Earthquake Prediction: R. Sugisaki ........................................ 1264

Homogeneous Fluorescent Immunoassay: J. Briggs, V. B. Elings, D. F. Nicoli ........ 1266

Fly Ash-Derived Strontium as an Index to Monitor Deposition from Coal-Fired Power Plants: I. R. Straughan et al. ........................................... 1267

Cover

Adult male chacma baboon (Papio ursinus) inspects an infant as the mother watches. These baboons live in multimale, multifemale groups. Dominant males mate with females and subsequently protect their probable offspring in the presence of potentially infanticidal immigrant males. See page 1281. [William J. Hamilton III, Institute of Ecology, University of California, Davis 95616]
