SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 464450) paid at Washington, D.C., and at an additional entry. New combined with The Science Monitor © Copyright © 1981 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $43; Domestic institutional subscription (51 issues): $60; Foreign postage extra: Canada $24, other (surface mail $27, air-surface via Amsterdam $65. First class, airmail, school-year, and student rates on request. Single copies $2 ($2.50 by mail); back issues $3 ($3.50 by mail); classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes.
BOOK REVIEWS

Science and Polity in France at the End of the Old Regime, reviewed by K. M. Baker; Prelude to Galileo, E. Grant; The Structure and Evolution of Normal Galaxies, M. S. Roberts; Perspectives on Cognitive Science, G. A. Miller; Chloroplasts, D. J. Goodchild; Books Received .......................... 54

COVER

Large ground finch (Geospiza magnirostris) on Isla Pinta, Galápagos. A study of banded individuals of another population of Darwin’s finches, Geospiza fortis on Isla Daphne Major, has demonstrated natural selection; large birds with large bills survived better than small birds with small bills during a drought when food was scarce. See page 82. [D. Schluter, Division of Biological Sciences, University of Michigan, Ann Arbor 48109]
