Vibratory Communication Through Living Plants by a Tropical Wandering Spider: J. S. Rovner and F. G. Barth

Choline Stimulates Nicotinic Receptors on Adrenal Medullary Chromaffin Cells to Induce Catecholamine Secretion: R. W. Holt and R. A. Senter

Multiple Opiate Receptors: Alcohol Selectively Inhibits Binding to Delta Receptors: J. M. Hiller, L. M. Angel, E. J. Simon

Brain Pyruvate Dehydrogenase: Phosphorylation and Enzyme Activity Altered by a Training Experience: D. G. Morgan and A. Routtenberg

Waveform Generator; Storage for Hazardous Chemicals; Sample Extraction; Low-Temperature Diffractometer Sample Chamber; Acoustic Microscope; Mouse Hybridoma Adjunct Reagents; Literature

Cover

Oblique aerial photograph of a Louisiana salt marsh dominated by smooth cordgrass, Spartina alterniflora. In the marsh interior, Spartina dieback, characterized by sparse vegetation and open water bodies, is evident. Ecomorphological studies show that roots of highly productive streamside Spartina (adjacent to streambanks) respire aerobically, while that of the inland and dieback sites respire anaerobically. See page 439. [R. Boyd, Louisiana State University, Baton Rouge, Louisiana 70803]
