SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 464460) paid at Washington, D.C. and at an additional entry. Now combined with The Science Monthly; Copyright © 1987 by the American Association for the Advancement of Science. Domestic individual membership and subscription ($1 issues): $365. Domestic institutional subscription ($1 issues): $65. Foreign postage extra: Canada $24; other (surface mail) $27; air-surfaces via Amsterdam $55. First class, airmail, school-year, and student rates on request. Single copies $2 ($2.50 by mail); back issues $3 ($3.50 by mail); classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
BOOK REVIEWS

Phylogenetics, reviewed by A. G. Kluge; Movable Genetic Elements, L. Rothman-Denes; Essays in General Relativity, R. Wald; The Landforms of Japan, V. R. Baker; The Ferment of Knowledge, R. Rappaport; Books Received .......................................................... 51

Detection of Mutagens in Complex Samples by the Salmonella Assay Applied Directly on Thin-Layer Chromatography Plates: A. Bjørseth et al. .................. 87

COVER

Male fawn of the white-tailed deer (Odocoileus virginianus), 5 weeks old. Fawns of that age derive most of their energy from milk and the remainder from vegetation. They run about 450 meters in a play bout. When deprived of part of their milk, they continue to play, rest more, and compensate by increased grazing. See page 85. (Richard Altieri, P.O. Box 399, Tully, New York 13159)
