SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 444460) paid at Washington, D.C., and at an additional entry. Now combined with The Science Monitor. Copyright © 1982 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $43. Domestic institutional subscription (51 issues): $80. Foreign postage extra: Canada $24; other (surface mail) $27; air service via Amsterdam $55. First-class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $3 ($3.50 by mail); classroom rates on request. Change of address: allow 6 weeks; give old and new addresses and seven-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
Prescribed Fire: Effects on Water Quality and Forest Nutrient Cycling:
D. D. Richter, C. W. Ralston, W. R. Harms .......................................................... 661
Salt Diapirs Bordering the Continental Margin of Northern Kenya and Southern
Somalia: P. D. Rabinowitz, M. F. Coffin, D. Falvey .............................................. 663
Carbonyl Sulfide and Carbon Disulfide from the Eruptions of Mount St. Helens:
R. A. Rasmussen et al. ......................................................................................... 665
Radium-226 and Radon-222 in the Coastal Waters of West Florida: High
Concentrations and Atmospheric Degassing: K. A. Fanning,
J. A. Breland II, R. H. Byrne .............................................................................. 667
Cyttoplasmic Calcium in the Mediation of Macula Densa Tubulo-Glomerular
Feedback Responses: P. D. Bell and L. G. Navar .................................................. 670
Neutrophil Activation Monitored by Flow Cytometry: Stimulation by Phorbole
Diester Is an All-or-None Event: D. G. Hafeman et al. ............................................. 673
Corticotropin-Releasing Activity of α-Melanotropin: M. Lis et al. ............................ 675
Identification of a BALB/c H-2Ld4 Gene by DNA-Mediated Gene Transfer:
R. S. Goodenow et al. ......................................................................................... 677
DNA Sequence of a Gene Encoding a BALB/c Mouse Ld4 Transplantation Antigen:
K. W. Moore et al. .............................................................................................. 679
Histone Proteins in HeLa S2 Cells Are Synthesized in a Cell Cycle Stage
Specific Manner: F. Marashi et al. ........................................................................ 683
Uninvolved Skin from Psoriatic Patients Develops Signs of Involved Psoriatic Skin
After Being Grafted onto Nude Mice: J. E. Fraki, R. A. Briggaman,
G. S. Lazarus ........................................................................................................ 685

Crystallization of Recombinant Human Leukocyte Interferon A: D. L. Miller,
H. Kung, S. Pestka ............................................................................................... 689
Thermal Insulating Capabilities of Outdoor Clothing Materials:
W. C. Kaufman, D. Bothe, S. E. Meyer ................................................................ 690
Haptoglobin: A Natural Bacteriostat: J. W. Eaton et al. .......................................... 691
Primary Changes of Membrane Currents During Retention of Associative
Learning: D. L. Alkon, I. Lederhendler, J. J. Shoukimas ........................................ 693
Internal Hydrogen Bond Formation in a syn-Hydroxyepoxide: J. P. Glusker et al. 695
Survival of Frogs in Low Temperature: W. D. Schmid ............................................ 697

Technical Comments: Fossil Genes: Scarce as Hen’s Teeth?: B. Grant and
L. L. Wiseman; E. J. Kollar and C. Fisher ............................................................ 698

Cover
Prescribed burning has become of major importance to the multiresource management of the southern pine forest. Fire is used periodically in the life of pine stands to manipulate understory vegetation and to reduce the risk of wildlife by controlling litter build-up. Although prescribed fires partially consume important components of the pine forest ecosystem, the fires have limited effects on soils, nutrient cycles, and hydrologic systems. See page 661.

Daniel H. Geibert & Associates, Forestry Consultants, Durham, North Carolina
