SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 484460) paid at Washington, D.C., and at an additional entry. Now combined with The Science Monitor. Copyright © 1982 by the American Association for the Advancement of Science. Domestic individual members subscription and subscription (51 issues): $48. Domestic institutional subscription (51 issues): $85. Foreign postage extra: Canada $24, other (surface mail) $27, air-surface via Amsterdam $55. First class, airmail, school-year, and student rates on request. Single copies $2.50 ($3 by mail); back issues $3 ($3.50 by mail); classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
Infrared Spectrum of the Purple Membrane: Clue to a Proton Conduction Mechanism?: S. Krimm and A. M. Dwivedi

Substance P and Cholecystokinin-Like Peptides in Helix Neurons and Cholecystokinin and Serotonin in a Giant Neuron: N. N. Osborne, A. C. Cuello, G. J. Dockray

Entorhinal Cortex Lesions Induce a Decreased Calcium Transport in Hippocampal Mitochondria: M. Baudry et al.

Cholinergic Innervation in Neuritic Plaques: R. G. Struble et al.

Systemic Lupus Erythematosus-Like Syndrome in Monkeys Fed Alfalfa Sprouts: Role of a Nonprotein Amino Acid: M. R. Malinow et al.

Calcium and Age in Fibroblasts from Control Subjects and Patients with Cystic Fibrosis: B. L. Shapiro and L. F. H. Lam

Pituitary Receptor Site Blockade by a Gonadotropin-Releasing Hormone Antagonist in vivo: Mechanism of Action: D. Heber et al.

Synaptic Cleft Glycoproteins Contain Homologous Amino Acid Sequences: E. E. Mena and C. W. Cotman

Pheromone Source Location by Flying Moths: Supplementary Non-Anemotactic Mechanism: T. C. Baker and L. P. S. Kuenen

Experimental Hepatic Encephalopathy: Changes in the Binding of γ-Aminobutyric Acid: M. Baraldi and J. L. Zeneroli

Rediscovery of the Yellow-Fronted Gardener Bowerbird: J. M. Diamond

Heroin "Overdose" Death: Contribution of Drug-Associated Environmental Cues: S. Siegel et al.

Tumor Rejection in Rats After Inescapable or Escapable Shock: M. A. Visintainer, J. R. Volpicelli, M. E. P. Seligman

Behavioral Sequences During Dominance Hierarchy Formation in Chickens: I. D. Chase

Bowerbird (Amblyornis flavifrons) recently rediscovered in a remote part of New Guinea. To attract females, males build a stick tower on a rimmed moss platform, decorate it with fruit of three different colors, and extend toward the female a blue fruit set against the golden crest. See page 431. [Painting by William Cooper, The Birds of Paradise and Bower Birds, William T. Cooper and Joseph M. Forshaw. First published in Sydney, Australia, by William Collins Publishers, 1977; first U.S. edition by David R. Godine, Publisher, Boston, Massachusetts, 1979]
