Patent drawing of Robert Fulton’s steamboat. “Before Fulton applied for his first patent in 1809, he had turned over machine drawing to others, but they worked very closely under his supervision. . . . This view of the Steam Boat was probably an accurate view of the rebuilt boat that had made the 1807 trip to Albany, by now already being called the Clermont.” [American Society of Mechanical Engineers; reproduced in part in Emulation and Invention, reviewed on page 853]
