BOOK REVIEWS
Two Great Scientists of the Nineteenth Century, reviewed by J. E. Lesch; The Formation of the German Chemical Community (1720–1795), A. L. Donovan; The Scottish Book, P. R. Halmos; The Cacti of the United States and Canada, N. H. Boke; Books Received.............................. 879

REPORTS
Seasonality and Interaction of Biogenic and Lithogenic Particulate Flux at the Panama Basin: S. Honjo................................................................. 883
Pressure Enhancement of Ion Mobilities in Liquid Silicates from Computer Simulation Studies to 800 Kilobars: C. A. Angell, P. A. Cheeseman, S. Tamaddon................................................................. 885
Monoclonal Antibodies to Hypothalamic Growth Hormone–Releasing Factor with Picomoles of Antigen: R. A. Luben et al. ................................. 887
Neuromagnetic Localization of Epileptiform Spike Activity in the Human Brain: D. S. Barth et al.......................................................................... 891
Stimulation of Feeding in Rats by Intraperitoneal Injection of Antibodies to Glucagon: W. Langhans et al.............................................................. 894
Larval Testes of the Tobacco Budworm: A New Source of Insect Ecdysteroids: M. J. Loeb et al................................................................. 896
Photoreceptor Membrane Shedding and Assembly Can Be Initiated Locally Within an Insect Retina: D. S. Williams................................................................. 898
Role of Serotonergic Input in the Regulation of the β-Adrenergic Receptor–Coupled Adenylate Cyclase System: A. Janowsky et al........................................ 900
Deoxyglucose Analysis of Retinotopic Organization in Primate Striate Cortex: R. B. H. Tootell et al................................................................. 902
Sex Preselection in Mammals? Separation of Sperm Bearing Y and “O” Chromosomes in the Vole Microtus oregoni: D. Pinkel et al.............................................. 904
Touching Textured Surfaces: Cells in Somatosensory Cortex Respond Both to Finger Movement and to Surface Features: I. Darian-Smith et al................................. 906
Manipulation of Event-Related Potential Manifestations of Information Processing Stages: W. Ritter et al................................................................. 909
Impulse Conduction in the Mammalian Brain: Physiological Properties of Individual Axons Monitored for Several Months: H. A. Swadlow.............................. 911
Rapid and Precise Down Regulation of Fast Axonal Transport of Transmitter in an Identified Neuron: J. M. Aletta and D. J. Goldberg................................. 913
Electric and Magnetic Field Detection in Elasmobranch Fishes: A. J. Kalmijn................................................................. 916

Technical Comments: Correlations Perceived and Measured: S. Ehrenson; W. S. Cleveland; Radiation Angle and Heat Transferred to a Bird: J. P. Hailman; S. Lustick................................................................. 918

COVER
Male locust, Valanga irregularis. The turnover of photoreceptor membrane is shown to be controlled locally within individual ommatidia of the compound eye of this animal. Body length of animal is 80 millimeters; width of the eye is 4 millimeters. See page 898. [Kerrie Ruth, Neurobiology Department, Australian National University, Canberra 2601]
