Implantable FM Transmitters; Ion Chromatograph; Floating Point Array Processor; Hand-Held Computer; Protecting Group for Amino Acids; Fermentation pCO2 Electrode; Lipopolysaccharides; Compact Storage Freezer; Literature .................................................. 1148

COVER
Venus flytrap in its native habitat in the sandy, mineral-poor soil of North Carolina's Green Swamp. The species, which is a candidate for endangered species status, is often sold as a novelty because of its rapid leaf movements which are due to very rapid acid growth. See page 1120. [S. E. Williams, Boyce Thompson Institute for Plant Research, Cornell University, Ithaca, New York 14853]
