SCIENCE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Second-class postage (publication No. 484460) paid at Washington, D.C., and at an additional entry. Now combined with *The Science Monthly*. Copyright © 1982 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): \$48. Domestic institutional subscription (51 issues): \$85. Foreign postage extra: Canada \$24, other (surface mail) air-surface via Amsterdam \$55. First class, airmail, school-year, and student rates on request. Single copies \$2.50 (\$3 by mail); back issues \$3 (\$3.50 by mail); classroom rates on request. **Change of address:** allow 6 weeks, giving old and new addresses and seven-digit account number. **Postmaster:** Send Form 3579 to *Science*, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. *Science* is indexed in the *Reader's Guide to Periodical Literature* and in several specialized indexes.

Rime ice accumulation on the western, windward side of a balsam fir on Mount Moosilauke, New Hampshire. Rime ice is a winter manifestation of cloud droplet deposition. Because the supercooled cloud droplets freeze upon impact and accumulate as rime ice, droplet deposition is more obvious in the winter than in the summer when the droplets coalesce and drip off the branches. See page 1303. [William A. Reiners, Dartmouth College, Hanover, New Hampshire 02755]
