COVER

Erosion from a 9-centimeter rain falling in 45 minutes in mid-May 1982 on a field in Woodbury County, Iowa. The area received as much as 23 centimeters of rain during the week. Erosion was estimated to be as much as 330 tons per hectare (2.5 centimeters). About 90,000 hectares of cropland were heavily damaged by the storm. See page 458. [Lynn Betts, Soil Conservation Service]
