Tumor Suppression with a Combination of d-Difluoromethyl Ornithine and Interferon: P. S. Sunkara et al. ...................................................................................................................... 851

The Human c-ras H Oncogene: A Mutation in Normal and Neoplastic Tissue from the Same Patient: R. J. Muschel et al. ..................................................................................................................... 853

Isolation and Transmission of Human Retrovirus (Human T-Cell Leukemia Virus): M. Popovic et al. ...................................................................................................................... 856

A Nonenzymatic RNA Polymerase Model: T. Inoue and L. E. Orgel ................................................................................................................................. 859

Gene Reactivation in Erythrocytes: Nuclear Transplantation in Oocytes and Eggs of Rana: M. A. DiBerardino and N. J. Hoffner ................................................................. 862

[121]Insulin Metabolism in Normal Rats and Humans: External Detection by a Scintillation Camera: J. C. Sodoyez et al. ...................................................................................................................... 865

Intracellular Calcium Measurements with Arsenazo III During Cyclic AMP Injections into Molluscan Neurons: F. Hockberger and J. A. Connor ................................................................. 869

Independent Pathways for Secretion of Cholesterol and Apolipoprotein E by Macrophages: S. K. Basu, J. L. Golstein, M. S. Brown ...................................................................................................................... 871

Shift Work Among Dual-Earner Couples with Children: H. B. Presser and V. S. Cain ................................................................................................................................. 876

Human Brain Tumor-Derived Cell Lines: Growth Rate Reduced by Human Fibroblast Interferon: A. W. Cook et al. ................................................................................................................................. 881

COVER

"Burning the midnight oil" at the Old Executive Office Building, Washington, D.C., late December 1982. Officials of the Office of Management and Budget work nights and weekends preparing the President's fiscal budget for presentation to Congress in January. R & D in the budget will be discussed at the Eighth Annual AAAS Colloquium on R & D Policy, 24–25 March 1983, Washington, D.C. See page 834. [Al Teich, Office of Public Sector Programs, AAAS]
